ABOUT GARMIN HEALTH

Garmin Health, a leading provider of digital health solutions that leverage the sensor data and insights of the Garmin product ecosystem, delivers custom results for corporate wellness, population health and patient monitoring programs. By using the Garmin Health API and SDK, third parties can seamlessly integrate real-time and historical smartwatch data into their apps in accordance with their specific privacy policies. As part of a global company that designs, manufactures and ships products worldwide, Garmin Health empowers enterprises to work with a single, trusted provider.
