PROTOBOX

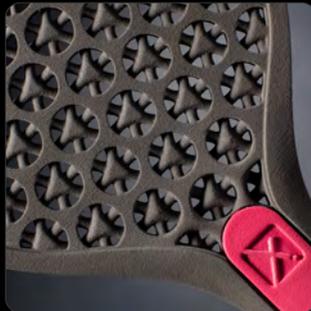

protobox.es

Protobox is the specialized division of ANIMA Design focused on high-precision prototypes, molds, and advanced tooling. We bridge the gap between concept and mass production through technical excellence and DFM (Design for Manufacturing) expertise.

- **Integrated engineering:** Seamless transition from industrial design to functional parts.
- **FusionMold® technology:** Our exclusive plastic injection system with exact Pantone/RAL matching. Low cost and premium results.
- **Advanced material library:** Rigid, elastomeric, transparent, flame retardant, and autoclave-resistant polymers.
- **Cost & Lead-Time Optimization:** In-house production reduces industrialization risks and accelerates time-to-market.

Real testing. Zero industrial risk.
