## Venture Leaders Mobile 2026

Every year, Venturelab selects the Venture Leaders teams, a selection of the most promising Swiss-based startups, for an international business development roadshow. Venture Leaders Mobile is a unique business development program that explores international market potential for high-growth Swiss startups. It is an exclusive opportunity to be a part of a top entrepreneurial team, accelerate one's business growth, and showcase Switzerland as a leading country for innovation.

The 10 startups will follow in the footsteps of high-flying former team members such as [greenteg](#), [Corintis](#), [technis](#), [ecorobotix](#), [RealTyme](#), [Almer Technologies](#) (acquired by [RealWear](#)), and many more.

After reviewing over 115 applications, a jury of investors and mobile experts selected ten startups to join the [4YFN](#) – the startup platform of the [Mobile World Congress](#) (MWC), one of the industry's largest annual startup events in Barcelona. The roadshow provides a unique opportunity for entrepreneurs to accelerate their startups' expansion in the mobile and digital ecosystem while expanding their professional network and profiting from pitch sessions with investors and networking with industry leaders. The agenda also includes participation in the [Venturelab Sailing Trophy](#) and several pitch events designed to connect Swiss startups with relevant contacts in the mobile and digital ecosystem. From February 28th to March 5th, 2026, the Swiss National Startup Team will fly to Barcelona. The ten selected startups represent Swiss top excellence across a diverse spectrum. From battery technology, space, cybersecurity, and wireless tech to autonomous driving, mobile security, wildlife monitoring, and robotics.

The Venture Leaders Mobile is organized by Venturelab and supported by [Huawei](#), [Swisscom Ventures](#), and [VISCHER](#).

## Meet the Venture Leaders Mobile 2026

### **BTRY** | Zurich | [www.btry.ch](http://www.btry.ch)

ETH and Empa spin-off BTRY develops an ultra-thin solid-state battery that delivers lithium-ion-level energy density with supercapacitor-like power, suited for sub-1Ah devices.

### **DPHi Space** | Lausanne | [www.dphispace.com](http://www.dphispace.com)

DPHi Space builds and operates shared satellites that give organisations quicker, more flexible, and cost-efficient access to space through an integrated platform and service model.

### **DuoKey** | Lausanne | [www.duokey.com](http://www.duokey.com)

DuoKey provides enterprise-grade cloud security with advanced encryption and distributed key management, enabling organisations to protect sensitive data across environments.

### **EM Path** | St. Gallen | [www.empath.ch](http://www.empath.ch)

EM Path supports industries such as electronics, automotive, SATCOM, IoT, and medical by delivering wireless testing solutions that measure system performance under real conditions.

### **Ionic Wind** | Lausanne | [www.ionicwind.ch](http://www.ionicwind.ch)

Ionic Wind offers a proprietary airflow technology that produces directed air streams without moving parts, creating new options for cooling, propulsion, and compact system design.

### **LOXO** | Bern | [www.loxo.ch](http://www.loxo.ch)

LOXO develops autonomous driving software for commercial vehicles, providing a digital driver designed to support business operations, strengthen safety, and reduce urban emissions.

### **Mosaic SoC** | Zurich | [www.mosaic-soc.com](http://www.mosaic-soc.com)

Mosaic SoC advances edge AI with a new chip architecture built for real-time performance in AR, VR, robotics, and autonomous systems, enabling faster and more efficient processing.

### **Soverli** | Zurich | [www.soverli.com](http://www.soverli.com)

Soverli addresses the challenge of securing smartphones without limiting usability, offering a platform that helps organisations manage risks while maintaining device flexibility.

### **Synature** | Lausanne | [www.synature.ch](http://www.synature.ch)

Synature develops technology that interprets animal communication, aiming to provide actionable signals for applications in nature monitoring, agriculture operations, and aquaculture.

### **Tethys Robotics** | Zurich | [www.tethys-robotics.ch](http://www.tethys-robotics.ch)

Tethys Robotics builds autonomous underwater systems for accurate inspections in turbid or high-current waters, offering capabilities that exceed the limits of ROVs and human divers.

## About Venture Leaders

The Venture Leaders – the members of the Swiss National Startup Team – have a clear goal: envisioning themselves as global players, they want to take the first step towards their global expansion. Venturelab has over 20 years of experience bringing Switzerland's best entrepreneurs to the heart of the global technology hubs: Silicon Valley, Boston, China, London, Barcelona, and Munich. Companies founded by the 600 Venture Leaders alumni have created more than 13,635 jobs and raised more than CHF 8,9 billion in investment capital. For more information, visit [www.venture-leaders.ch](http://www.venture-leaders.ch), and discover all the alumni [here](#).
