About Euskadi

Euskadi, as the Basque Country is known in Basque, is a small country but with a strong identity. With a history stretching back over 5,000 years, Euskadi has a distinctive culture and a language that is unique in the world. Euskadi is today a modern country that has managed to adapt to the times and is at the forefront of Europe in terms of quality of life and sustainable human development.

Industry as a driving force

Industry is the Basque economy's driving force and key to create quality jobs. It represents 24,1% of GDP and places Euskadi at the head of the industrial revolution. Looking ahead to 2030, this is the roadmap it has established:

+ More Industry Startups strengthening industrial growth.	↗ Better Industry Startups advancing technological excellence.	— Less Emissions Startups enabling clean industrial transformation.
---	--	---

Basque Country Startup Network

Euskadi has a World-class ecosystem fostering a robust intersection of startups, innovative corporates, Technology and Innovation Network, investors, and the best public support. All this, articulated by a comprehensive entrepreneurship policy supported through the BICs (Business Innovation Centres) and led by Basque Government-Spri and the three Provincial Councils: Araba, Bizkaia and Gipuzkoa.

Both private and public agents are joining forces to boost the best entrepreneurial environment to scale your business.

+900 Technology-based and/ or innovative companies	+6000 Employed people in the last 8 years	+400M€ Total revenue of the ecosystem
--	---	---

We invite you to meet 12 startups representing innovation across three provinces at 4YFN 2026. Find out more about them in the following pages.

Acuratio

Next-generation data collaboration with privacy by design

Startup details

Year Founded: 2017

Location: Donostia, Gipuzkoa

Sector: Intelligent Industry

Technology: Artificial Intelligence

Website: <https://www.acuratio.com/>

[LinkedIn](#)

Description

Acuratio delivers the most advanced decentralized clean room platform, enabling organizations to collaborate on sensitive data without ever exposing it.

Built for privacy-preserving AI and federated analytics, Acuratio enables secure computation, governance, and auditability across distributed environments. Data never leaves its origin, ensuring regulatory compliance and minimizing risk while unlocking cross-organization intelligence.

Our architecture combines decentralized orchestration, cryptographic safeguards, and scalable infrastructure to support real-world, high-trust data collaboration. Acuratio empowers the most regulated industries to innovate with data without compromise.

Baisma

Beyond the footprint · Integrated environmental assessment.

Startup details

Year Founded: 2025

Location: Bilbao, Bizkaia

Sector: Sustainability

Technology: Clean Tech

Website: <http://baisma.com/>

[LinkedIn](#)

Description

At Baisma, we develop technical and strategic solutions to advance sustainability, circularity, and decarbonisation. We support companies, organisations, and regions seeking to integrate environmental criteria into their management, projects, and key decisions. Our experience, practical vision, and approach—clear, creative, and purposeful—enable us to support real transformation processes.

Our solution enables integrated and systematic sustainability assessment, communication and reporting, taking into account environmental metrics such as: Carbon, environmental and water footprint, circularity and natural capital and biodiversity footprint.

We promote consistent, measurable sustainability that is aligned with current challenges.

Data Value Management

Startup specialising in the development of AI-based solutions.

Startup details

Year Founded: 2017

Location: Vitoria - Gasteiz, Araba

Sector: Intelligent Industry

Technology: Artificial Intelligence

Website: <http://datavaluemanagement.es>

[LinkedIn](#)

Data Value
management

Description

Company specialising in the development of simple, interactive applications based on artificial intelligence.

These applications enable the optimisation of tasks, consumption and processes through data exploitation, the development of predictive systems, the implementation of generative AI-based chatbots, the development of AI agents, task automation and the development of comprehensive dashboards.

All solutions developed are based on free software and are deployed on customers' servers, ensuring information security and ownership by the customer.

EscapeUp

Leading the Digital Transformation of the Escape Room Industry

Startup details

Year Founded: 2020

Location: Bilbao, Bizkaia

Sector: Entertainment

Technology: Software

Website: <https://escapeup.es/>

[LinkedIn](#)

The logo for EscapeUp, featuring the word "Escape" in a dark blue, lowercase sans-serif font, followed by "Up" in a lighter blue, uppercase sans-serif font.

Description

EscapeUp is the leading platform for discovering and booking escape rooms, connecting players and operators within a unified digital ecosystem. It integrates a marketplace, a gamified mobile app, and SaaS software (EBS) for venue management.

We enable bookings, team creation, leagues, and challenges, while providing operators with tools for management, distribution, and monetization.

With a hybrid B2C + B2B model, strong growth, and high repeat rates, we are building the largest escape room community in Spain and preparing for international expansion..

FitWoody

A proactive health agent for your fitness journey.

Startup details

Year Founded: 2023

Location: Vitoria - Gasteiz, Araba

Sector: Health

Technology: Artificial Intelligence

Website: <https://fitwoody.camp/>

[LinkedIn](#)

FitWoody

Description

FitWoody is building a proactive health agent powered by its own foundational model trained on wearable biometric data. The app connects to any smartwatch or health band, analyzes signals like heart rate variability, sleep patterns, and training load, and delivers the right insight at the right moment to keep users progressing on their fitness journey.

Instead of dashboards full of raw numbers, FitWoody acts as an intelligent coach that understands your body's daily readiness and tells you what to do next. Built in Europe with privacy-first architecture, serving 100,000+ users, and made for the days you want to quit.

Kimaiwi

Transform your website into a genuine platform for sales, user experience, marketing, and customer loyalty.

Startup details

Year Founded: 2023

Location: Vitoria - Gasteiz, Araba

Sector: Tourism

Technology: Software

Website: <https://www.kimaiwi.com/>

[LinkedIn](#)

Description

Kimaiwi is the technology startup that transforms the websites of hotels and tourist destinations into their own digital ecosystem. We integrate digital marketing, artificial intelligence and blockchain to improve visibility, traveller relations and loyalty, reducing dependence on intermediaries.

We combine strategy, knowledge, technology and digital ethics to offer advanced, accessible and profitable solutions tailored to the real needs of the tourism sector. Kimaiwi turns online presence into a living, intelligent and results-oriented asset.

Miramoön Pharma

Halting Degeneration

Startup details

Year Founded: 2019

Location: Donostia, Gipuzkoa

Sector: Health Tech

Technology: Biotech

Website: www.miramoonpharma.com

[LinkedIn](#)

The logo for Miramoön Pharma features the word "MIRAMOÖN" in a bold, dark blue, sans-serif font. Below it, the word "pharma" is written in a smaller, lighter blue, lowercase sans-serif font. To the right of the text is a large, dark blue, stylized crescent moon shape.

Description

Miramoön Pharma, backed by strong IP and an internationally experienced team, is developing a first-in-class small molecule platform designed to halt the progression of neurodegenerative diseases by restoring intracellular calcium balance, a key driver of cellular and tissue degeneration.

Our lead candidate, MP-004, targets retinitis pigmentosa and other inherited retinal disorders. Delivered topically, it efficiently reaches photoreceptors, preserving cell survival and restoring 50–70% of function in preclinical models. MP-004 has received FDA and EMA Orphan Drug Designation, shows no observed toxicity, and is advancing toward Phase I clinical trials in Q4 2026. Our pipeline also includes programs in cardiac and skeletal muscle diseases (MP-001) and central nervous system disorders, including ALS (MP-010).

Nexi Health

The mental health of patients, supported from start to finish.

Startup details

Year Founded: 2024

Location: Donostia, Gipuzkoa

Sector: Health Tech

Technology: Artificial Intelligence

Website: <https://nexi-health.com/>

[LinkedIn](#)

Description

Nexi Health develops artificial intelligence-based medical software to enhance mental health.

Our platform supports professionals in diagnosing, treating and monitoring patients, optimising clinical time, increasing accuracy and improving efficiency. With modules for professionals and patients, it collects structured data, detects risk signals and facilitates informed decisions, ensuring adherence and continuity of care.

Scalable and secure, Nexi Health enables hospitals, insurers and pharmaceutical companies to offer personalised and effective care, transforming mental health practice through technology that generates real value for patients and professionals.

Nymiz

Doc & AI Privacy

Startup details

Year Founded: 2019

Location: Bilbao, Bizkaia

Sector: Cybersecurity

Technology: Artificial Intelligence

Website: <https://nymiz.com/>

[LinkedIn](#)

Description

Nymiz is a privacy technology company building the ****AI Privacy Infrastructure layer**** for enterprises.

Its platform protects sensitive and personal data across every stage of the data lifecycle—before, during, and after AI and analytics processing. By combining real-time and batch anonymization, masking, tokenization, and PII detection, Nymiz enables organizations to safely adopt AI while remaining compliant with regulations such as GDPR, NIS2, and the EU AI Act. Designed as a scalable, modular solution,

Nymiz transforms privacy from a compliance requirement into a core, embedded infrastructure for secure data use and innovation.

Nutrenaissance

Science-based, AI-driven personalized precision nutrition.

Startup details

Year Founded: 2021

Location: Donostia, Gipuzkoa

Sector: Health

Technology: Artificial Intelligence

Website: <https://nutrenaissance.com/>

[LinkedIn](#)

NutreNaissance

Description

NN is an AI-powered personalized nutrition platform that integrates clinical data, lifestyle habits, genetics, microbiome insights, physical activity, and user context to deliver precise, actionable nutritional recommendations that maximize physical and mental performance, support treatments, and strengthen the neuroimmune system.

Its technology combines artificial intelligence, big data, proprietary algorithms, and machine learning models to optimize not only nutrient intake but also absorption and metabolic impact. NN is designed for individuals, healthcare professionals, and researchers, enabling preventive and tailored interventions that enhance physical, mental, and emotional health. The platform transforms complex biological and behavioral data into practical knowledge, advancing a new generation of precision nutrition focused on individual biology and measurable outcomes.

QCentroid

The Enterprise Quantum Operating System to build, run, benchmark and integrate quantum & hybrid optimization—across any hardware.

Startup details

Year Founded: 2022

Location: Bilbao, Bizkaia

Sector: Sustainability

Technology: Computing

Website: <https://www.qcentroid.xyz/>

[LinkedIn](#)

Description

QCentroid is building the Enterprise Quantum Computing Operating System: a QuantumOps layer that helps companies move from quantum experiments to deployable products.

We manage the full lifecycle—use-case discovery, model and data definition, execution across multiple quantum and classical backends, consistent benchmarking, and integration through stable APIs.

Teams can compare solvers as hardware evolves, keep results auditable, and reuse components through a growing catalog of enterprise-ready use cases. QCentroid accelerates time-to-value while maintaining IT control over governance, security and costs

Safeloc Systems

We turn centimeter-accurate real-time location data into safer, more productive industrial operations.

Startup details

Year Founded: 2022

Location: Donostia, Gipuzkoa

Sector: Intelligent Industry

Technology: Connectivity and IoT:

Website: <https://www.safeloc.es/>

[LinkedIn](#)

Description

Safeloc Systems builds real-time location solutions based on ultra-wideband (UWB) technology to enhance safety, productivity, and operational control in industrial environments.

Our platform provides centimeter-level accuracy to track people and assets in real time, helping companies prevent accidents, optimize workflows, and meet regulatory requirements. Designed to integrate with existing infrastructure, Safeloc scales across industries such as manufacturing, energy, logistics, and construction.

By turning precise location data into actionable insights, Safeloc enables industrial operators to reduce risk, improve efficiency, and accelerate digital transformation..

Samira DTx

We develop evidence-based digital therapies that empower patients and transform lives.

Startup details

Year Founded: 2025

Location: Derio, Bizkaia

Sector: Biotech

Technology: AI, Immersive Technologies

Website: <https://samiradtx.com/>

Description

SAMIRA DTx is a health technology company developing evidence-based Digital Therapeutics (DTx) to support people living with chronic diseases. Born from a patient's own experience with long COVID, SAMIRA DTx combines artificial intelligence, therapeutic gaming, virtual and augmented reality, and multimodal data analysis to create personalized digital interventions.

Our solutions focus on empowering patients, improving adherence, and enabling continuous monitoring beyond the clinical setting. Working alongside clinicians, researchers, and patient associations, we design technology that complements traditional care and brings human-centered innovation into healthcare.

Scott & Irwin

We create plug-and-play interactive experiences and digital assets that transform how brands connect with their customers through immersive technology.

Startup details

Year Founded: 2023

Location: Donostia, Gipuzkoa

Sector: Intelligent Industry

Technology: Immersive Technologies

Website: <https://scottandirwin.com/>

[LinkedIn](#)

Description

Scott & Irwin is a digital innovation studio specialized in creating high-impact, plug-and-play interactive experiences. Based in Donostia-San Sebastián, the startup transforms physical products, spaces, and processes into Interactive Digital Assets (IDAs). By leveraging cutting-edge XR technologies—including Virtual Reality, Augmented Reality, and holographic displays—they help brands like Formula 1, Mercedes-Benz, and CAF bridge the gap between the real and digital worlds.

Their mission is to democratize advanced immersive technology, making it accessible, scalable, and intuitive for companies of all sizes to enhance customer engagement, storytelling, and sales through a signature “wow effect”.

Vyne HR

We combine AI-powered automation with senior human expertise to deliver precise, continuous, and scalable talent selection.

Startup details

Year Founded: 2025

Location: Vitoria - Gasteiz, Araba

Sector: Human Resources

Technology: Artificial Intelligence:

Website: <https://www.vynehr.com/>

[LinkedIn](#)

Description

VYNE is a next-generation talent solutions startup that rethinks how companies hire. We combine advanced AI automation with senior human expertise to deliver faster, smarter, and more precise recruitment.

Our technology streamlines sourcing, screening, and data analysis, while experienced consultants focus on what truly matters: cultural fit, motivation, and long-term alignment. Built around a flexible subscription model, VYNE offers continuous access to high-quality talent support, not one-off placements. The result is a scalable, efficient, and deeply human approach to recruitment—designed for companies that value accuracy, clarity, and sustainable growth over volume hiring.

Yorsio

Turning rent into wealth for the next generation

Startup details

Year Founded: 2024

Location: Donostia, Gipuzkoa

Sector: Proptech

Technology: Software

Website: <https://www.yorsio.com/>

[LinkedIn](#)

Description

Yorsio is a proptech company rethinking how young people access housing.

We offer a smarter way to share apartments, allowing tenants to live with the flexibility of renting while converting part of their monthly payment into savings or even ownership. By aligning incentives between property owners and tenants, we create more stable, better-managed residential assets while helping the next generation build financial security through their housing.

zenit

Description

Zenit facilitates the creation and management of solar communities by combining an Idealista-type marketplace—where projects and participants connect—with an AI engine that optimises energy distribution and maximises economic returns.

The platform reduces barriers to activation, standardises operations and allows project portfolios to be scaled with traceability and measurable impact. It thus promotes access to local renewable energy through a profitable model and increases citizen participation in the energy transition.

Dive into the Basque Country

In the Basque Country, we believe and invest in our companies. For more than 40 years, we have been engaged in a race to be competitive, with a high industrial concentration and intelligent specialisation. Thanks to the Basque Country's tax autonomy and tax system, we have regulatory and management capacity and, today, we are one of the regions with the best reputation for doing business.

A pole of competitiveness

Basque industry has consolidated its commitment to efficiency, quality, technification and internationalisation, thanks to the industrial policy developed by the institutions. A good example of this are the clusters and their high levels of competitiveness, based on private collaborative management models.

Companies such as Gira Veolia, Alstom, Thyssenkrupp, General Electric, Mercedes-Benz and Siemens are already here. What about you?

How can we help you?
