About Pierson Wireless Services

Our customers are unique, and they deserve solutions tailored to their specific needs. Whether the project involves a small business or an industry-leading corporation, a modest retail store, or an ultra-modern high-rise building, Pierson Wireless is committed to customer satisfaction.

Excellence, innovation, communication, collaboration: They're not buzz words at Pierson Wireless, they're omnipresent traits in every customer relationship we build. It's the Pierson Wireless Advantage and with it, you can expect:

 **Industry-leading Expertise**

 **Unparalleled Professionalism**

 **Tailored, Turnkey Solutions**

 **Quality Execution**

 **Clarity Through Customer Education**

 **Clear and Consistent Communication**

 **Cost-effective Outcomes**

 **Actions that Reflect Our Core Values of Honesty, Integrity, Loyalty, and Trust**

About Pierson Wireless Services

Pierson Wireless employs full-time teams of experienced wireless specialists, including:

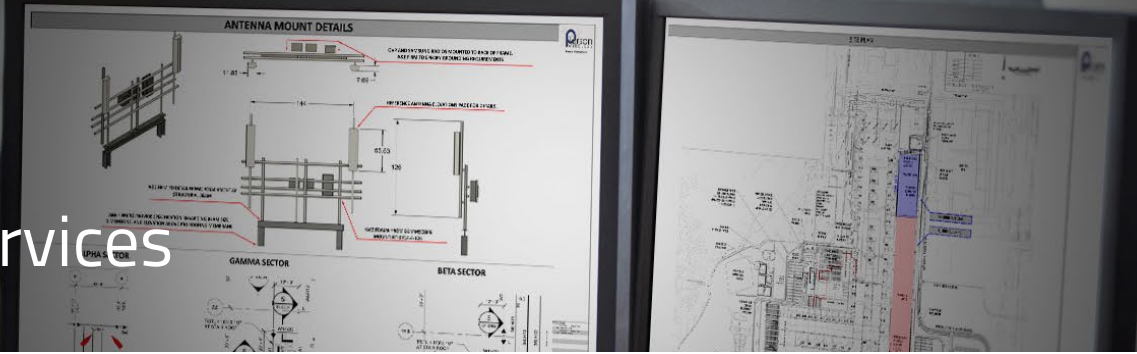

- ✓ Dedicated project managers
- ✓ Certified professional installers (CPI)
- ✓ Certified designers
- ✓ Trained RF engineers
- ✓ Monitoring & Maintenance experts

Our engineers and technicians are highly skilled and trained in:

- ✓ Fundamental RF theory
- ✓ Private network fundamentals
- ✓ LTE & 5G network performance
- ✓ Fiber optics installation & testing
- ✓ RF component PIM & sweep testing
- ✓ Passive & active network certification, testing & troubleshooting
- ✓ Distributed power certifications & capabilities

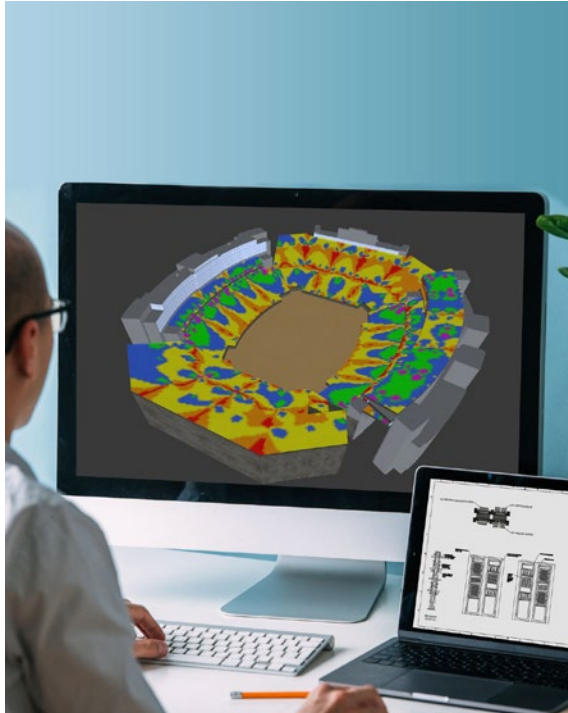

About Pierson Wireless Services

Pierson Wireless owns and utilizes carrier-grade test equipment, including:

- ✓ RF spectrum analyzers
- ✓ RF power meters
- ✓ RF signal generators
- ✓ Optical spectrum analyzers
- ✓ Optical power meters
- ✓ Optical Time Domain Reflectometer (OTDR)
- ✓ Continuous Wave (CW) & emulated signal generators
- ✓ Passive intermodulation (PIM) testers
- ✓ Automated indoor & outdoor network test equipment

Design & Engineering

Great wireless solutions originate from a meticulous design and engineering approach. Pierson Wireless has been an industry leader for two decades due to its commitment to hiring and training a great design team. Our design and engineering experts work directly with our customers to understand the intricacies and nuances of each project and create solutions that align with their key performance metrics.

- ✓ 5G, LTE, CBRS, and LAA expertise for all major network operators
- ✓ Multiple Spectrum Access System (SAS) provider relationships and capabilities
- ✓ iBwave 1, 2, and 3 licensed and certified on the worldwide software standard for indoor wireless network design
- ✓ OEM certified by industry leaders like Nokia, JMA Wireless, Ericsson, Cisco, Druid, SOLiD, Corning, ADRF, Commscope
