

Wi-Fi HaLow MM610X-001

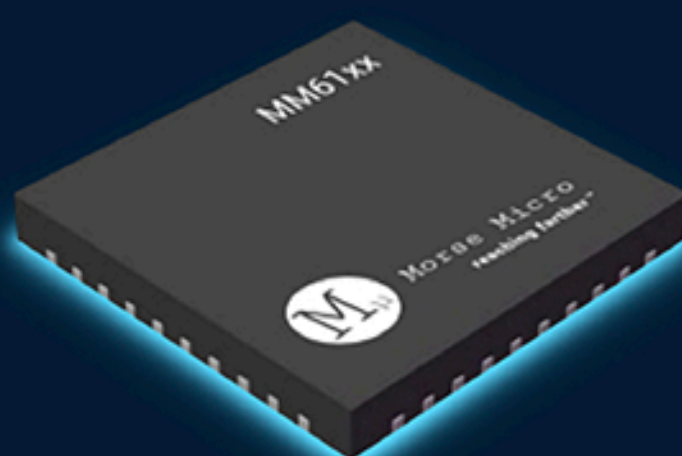

Federal
Communications
Commission

AsiaRF's Wi-Fi HaLow module, the MM610X-001, is powered by the Morse Micro® MM6108 SoC. It adheres to the Wi-Fi HaLow standard, offering IoT applications enhanced possibilities through its low power usage, extended range communication, and robust throughput.

3
YEARS

Smart PMU, low-power design,
3+ year lifespan.

Powered by Morse Micro®
MM6108 RF SOC

WPA3

Integrates WPA3 and OWE for
strong security.

- Stable connections with exceptional performance.
- Versatile interfaces: UART, SDIO, SPI, I2C.
- AES encryption engine, strong data security.
