AW300DP

Industrial-Grade
DPM Terminal

Experience cutting-edge DPM decoding technology paired with versatile multi-angle light source illumination. Our terminal also features a dedicated ring-shaped light source to ensure optimal supplementary lighting from all angles. Designed for superior performance in demanding environments.

DPM

AW300C

Cold Chain Handheld Terminal

Engineered with advanced defogging technology, this terminal ensures seamless transitions between cold and hot environments without the worry of water mist. Boost operational efficiency with uninterrupted scanning capability, perfect for workers frequently shifting between varying temperature scenarios. Designed for reliability in the cold chain industry.

AW800

Centimeter-Level High-Precision
Positioning Rugged Tablet

The AW800 RTK Android tablet is the ultimate solution for an efficient and productive mobile field workforce. With centimeter to decimeter positioning accuracy, this portable, rugged and versatile tablet is perfect for precision GIS data collection, forensic mapping, construction site development, environmental studies or landscaping. Its 8.1" sunlight-readable display makes it easy to clearly view GIS data tables, complex vector and raster maps, and high-resolution images, even in direct sunlight and high-light areas.

The AW800 brings precision GNSS positioning technology to any organization that needs to collect accurate and reliable data in the field, whether with a single operator or a large field crew.
