

Data Sheet

Bulk SMS/MMS Manager

A powerful end-to-end solution designed to simplify and optimize global bulk SMS and MMS messaging campaigns. Whether your goal is to send appointment reminders in healthcare, engage with customers in real estate, or manage ticket purchasing for sporting and entertainment events, our Bulk SMS Manager allows businesses to leverage both eSIMs and physical SIM cards to ensure unrestricted communication.

Key Benefits

Leverage virtual SIM or physical SIM cards from any carrier globally, mount them onto gateways (robots), and push/receive SMS/MMS messaging to targets.

Build out sequences and send cadences that prevent network blockages.

Avoid limitations that campaigners might impose.

Easy to use no advanced training needed.

Manage the full cycle of SMS campaigns upload contacts and messages, manage SIM cards and modems in real time, manage customer responses, and more.

Streamline SIM mounting and sending methods to ensure continuity of SIM cards and messaging campaigns.

Full end-to-end support from our engineering and technical team.

Industries

Marketing Agencies

Automate and personalize outreach to customers, using global SIM resources to ensure messaging hits their targets.

Real Estate

Send property listings, appointment reminders, and promotional messages to prospective buyers and tenants across various regions.

Finance

Manage sensitive communication like payment reminders, fraud alerts, and account updates from banks and collection agencies

Healthcare

Automatically send appointment reminders, prescription updates, and important patient communication securely and efficiently.

Ticket Brokers

Seamlessly manage order confirmations and other ticket broker concerns without the headache.

SaaS Companies

Integrate messaging features into software and applications with full control over SIM management, ensuring reliable delivery without the limitations of other platforms.

Our combined hardware and software solutions offer an unparalleled advantage in managing global SMS and MMS campaigns. By providing comprehensive control, flexible carrier options, and full automation, our technology delivers an unmatched experience, allowing businesses to focus on their messaging strategy while we handle the technical complexities.
