comfone

COMFONE'S KEY2ROAM PLATFORM

WHO WE ARE

Comfone stands alone as the sole provider offering **comprehensive connectivity solutions** to our customers.

Our goal is simple:
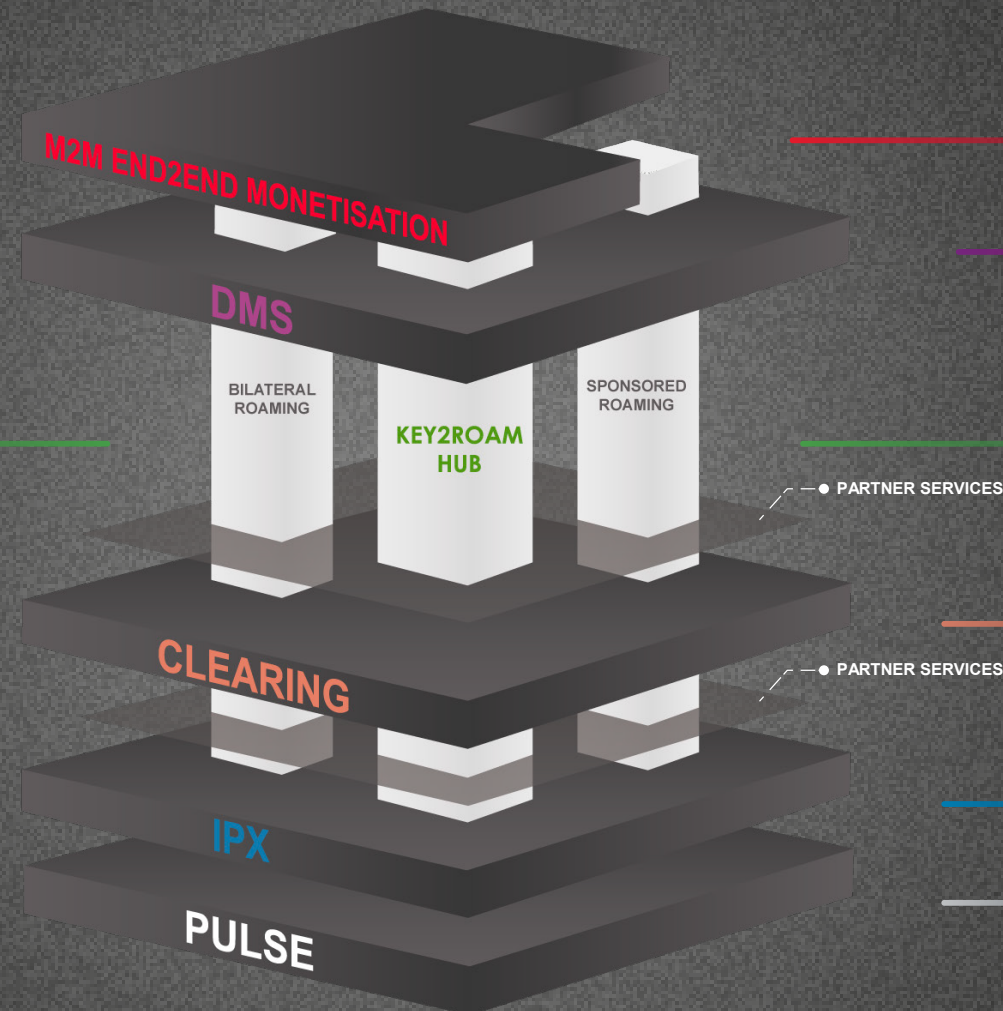

TO ENSURE YOUR SEAMLESS CONNECTION WITH THE WORLD

We have been providing roaming services since 1997 and are well-known in the telecommunications industry for delivering **top quality services with a focus on great customer care.**

If you are new to the world of roaming, we are here to give you the best possible head-start.

We offer all roaming services through our own unique ecosystem called **Key2roam Platform.**

Here, we provide all services required for **international connectivity,** as well as services designed specifically to **add value to your business, save you time and give you extra visibility every step of the way.**

HOW DOES IT WORK AND WHAT ARE YOUR BENEFITS?

The Key2roam Platform is Comfone's answer to navigating the complex world of international roaming. This unique ecosystem incorporates **compulsory elements, apps, value added services and partners.**

Compulsory elements include having a **commercial agreement** between networks with **signalling and data connections** in place. You will also need an interface to **exchange accounting and billing information** to ensure the correct charging needs are established.

A major benefit of using Comfone is that we provide **all roaming services.** This makes us unique in the industry.

We find that consolidating these services leads to many **business benefits and synergies.** As an example, our (big) **Data Management Service** provides valuable information for making **smart business decisions,** and helping you to effectively **monetise the traffic in your network.** Using multiple services from the **Key2roam Platform** bring our customers additional value, data and therefore knowledge to manage their roaming business efficiently.

OUR SERVICES

IPX

- SS7 Signalling for 2G/3G roaming, including interworking SMS delivery
