Modern businesses demand feature-rich telephony

Reinvent your outdated voice services with our Cloud PBX

- Revenue sharing model 50/50
- Over 60K+ active companies
- Zero risk. No investment
- More than 100+ operators
- Pay only for existing customers
- Market leader-level product
- Your brand. Complete customization
- Development & support included

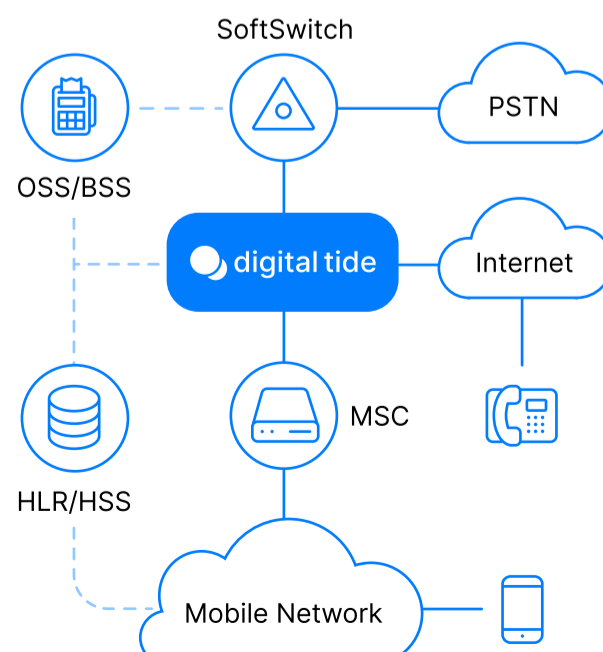

Fixed-line operators

The platform connects to the operator's station or softswitch via SIP, typically requiring only simple trunking. For TDM, industrial VoIP gateways can be used.

Mobile operators

The platform connects to the mobile operator's transit switch via SIP, typically through a straightforward trunk connection. Calls are routed through our platform and processed.

Launch your own Cloud PBX service in just 14 days

and Become N°1 in your market

1

Choose Your Setup

Cloud or on-premise — your choice

2

Deploy the Service

We manage installation,
you provide resources

3

Make It Yours

Custom interface localized
to your market

4

Connect Your Lines

Through Trunk
or SIP integration

5
