

# Odine Orion™ DID/ITFS Inventory Module

## Individual Number Management System

### Key Features & Capabilities

#### Comprehensive Order Management

- Define and manage sell and buy orders for required numbers.
- Set pricing and configure routing, destinations, and trunks - all from a single interface.

#### Microsoft Teams Routing Integration

- Enhance connectivity and workflow efficiency with seamless Microsoft Teams integration.

#### Unified Voice & DID Management

- Manage both Voice and DID services within a single application (Orion).
- Import purchased and unpurchased numbers into Excel/CSV files.
- Apply any currency to individual numbers or number ranges.

#### About Odine Orion™

Odine Orion™ empowers intelligence in your inbox and enables smart business decisions. This suite of voice solutions is sustainable, efficient and resilient, equipping you with the tools you need to build a more value-led and dynamic voice model. Harness market proven applications and a fully managed platform, deployed in an environment that works for you.

#### Seamless Vendor Integration

- Connect with vendors via API for instant access to a global portfolio of number ranges.
- Resell inbound DIDs (Local, Toll-Free, Premium, and International) to call centres and enterprises effortlessly.
- Set default routing using A-Z routing, a preferred supplier, or reject calls before selling a number or number range.

#### Real-Time Inventory Tracking

- Live-track all sold and unsold number ranges.
- Easily export sold and unsold numbers.
- Set default routing using A-Z routing, a preferred supplier, or reject calls before selling a number or number range.

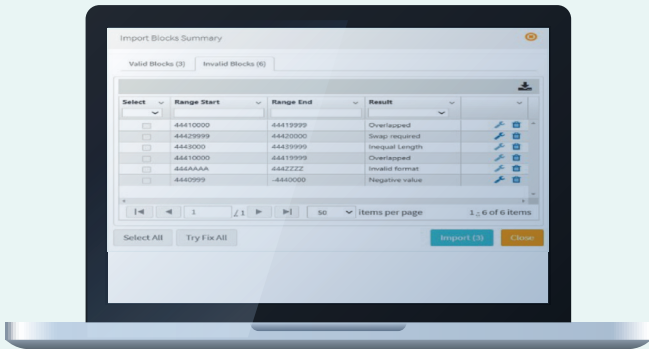

ITFS & DID Management
