OFFERING BETTER REMOTE CONFERENCEING EXPERIENCE

As the remote communications become trending, seeking proper means of ensuring the stable connection and effective interaction for video conferencing has been escalated to the highest urgency.

eMeet is committed to offering better experience for video conferencing, with the a full range of products merging the high-definition streaming, far-field voice pickup, and the proprietary Voice IA® technology, aiming to make meetings simple!

“ We are striving to being the leader as a solution provider on the mobile office market. ”

——Wyman Chen
eMeet CEO

ADOPTING EDGE-CUTTING TECHNOLOGY

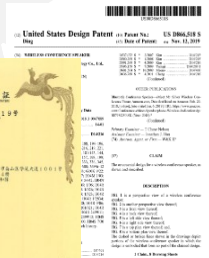

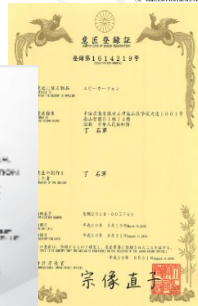

Working with the best engineers in speech/image signal processing field over the world, eMeet is devoted to developing the edge-cutting AI technologies, called **VoicelA®** and **WoHoSpeech™**, to cancel the environmental noise, realize voice-to-text and real-time translation.

Every model is well designed and carefully crafted by eMeet professionals. Keeping up with the edging technology, as well as boost the consumer experience continuously, are always the top priorities to eMeet.

The 10 Best Bluetooth Speakerphones NO.1

c/net
Best speakerphone in 2021 for working from home

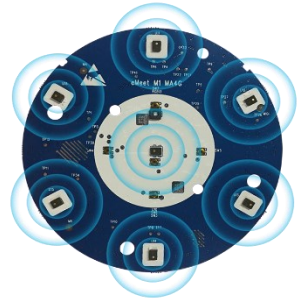

CORE COMPETITIVENESS

Microphone Array Signal Processing

eMeet speakerphone offers crystal-clear audio by applying the proprietary **VoicelA**® technology.

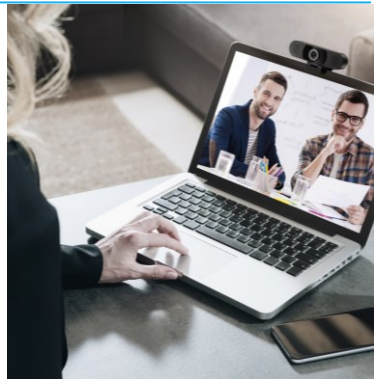

The acoustic echo canceller completely eliminates the echo and the noise isolating microphones ensure the superior experience even in the noisy outdoors settings. No matter in a meeting room or at your home, feel free to make your call any time and any where.

HD Real-time Cloud Communication

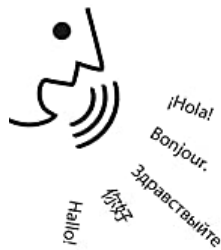

A good conferencing is more than a flawless presentation, but also a fresh connection with all attendees.

eMeet is holding the mission of offering the best-in-class Unified Communications Technology Platforms, to make the communication more convenient and smoother.

WoHoSpeech™

Empowered by the big scale of Internet data and the powerful natural language processing engine, the proprietary **WoHoSpeech™** is designed to help users cross the language gap and support the translation of 22 most popular languages over the world.

Speakerphone

USB Webcam

SPEAKERPHONE

With the superior audio capability, eMeet speakerphone provides an efficient way to make conference calls flexible no matter you're in or out of the office. Edging technology in Microphone array is bringing the excellent effect of echo elimination and active noise reduction, to ensure all the messages in the conference be perfectly transmitted.

CONFERENCE SPEAKERPHONE

- Looking for a way of hearing the calls clearly in a noisy office?
- Seeking the means of transmitting your voice rather than noise?

eMeet Speakerphone is prepared and ready to bringing you the superior customer satisfaction.

Microphone array & AI noise reduction

Armed with microphone Array and **VOICEIA**®, AI Noise Reduction technology, eMeet speakerphone lineup provides ultra-clear voice, meanwhile effectively reduces echo and ambient noise.

Born for conference call

Support the popular video calling applications, e.g. *Skype for Business, Teams, and Zoom*, for launching a professional conference. Perfectly fitting the meeting with 3 – 16 attendees.

Simple but powerful

Plug and play, no driver is required. eMeet Bluetooth / USB conference speakerphone saves your time in setting up.

High-quality audio guarantee

No matter you are working in the office or at home, making a call via speakerphone is always a joyful experience.

Wireless dongle for PC

The Bluetooth wireless dongle for instant plug-and-play on the PC is an accessory to keep the stable connection anytime.

USB SPEAKERPHONE OFFICECORE M0

4 microphones with the omnidirectional configuration make the eMeet M0 suitable for groups of up to 5 attendees. It's compatible with Skype as well as most VoIP clients and offers acceptable sound quality at a relatively low price.

- ✓ Echo cancellation
- ✓ Active noise reduction
- ✓ Plug and play
- ✓ Compact and portable
