

# SIMCom Company Profile

---

**INVENTING A SMART FUTURE**

[www.simcom.com](http://www.simcom.com)

# SIMCom: The Global Supplier of IoT Modules

**No. 1**

in module shipments for 4 consecutive years

**250M+**

Cumulative shipment (pcs.)

**300M+**

2021 Sales Target (\$)

**20 Years**

Wireless module development experience

**180+**

Countries/regions in which we have customers

**10,000+**

Global customers

**300+**

Patents and certifications

**76M+**

Investment in 5G R&D and automation equipment (\$)

**2000m<sup>2</sup>+**

Laboratory area

# Leading the Development of Wireless Modules Industry

- SIMCom set up.
- Launched the first self-developed 2G Module.
- First time enter to Asia-pacific market.

- Enter to front-vehicle high-end market.
- Global shipment risen continuously.

- Launched first 5G Module.
- Launched the world's smallest 5G module.
- Cumulative shipments exceed 200 million.

- First time enter to NA high end market.
- Get the certification of overseas operators.

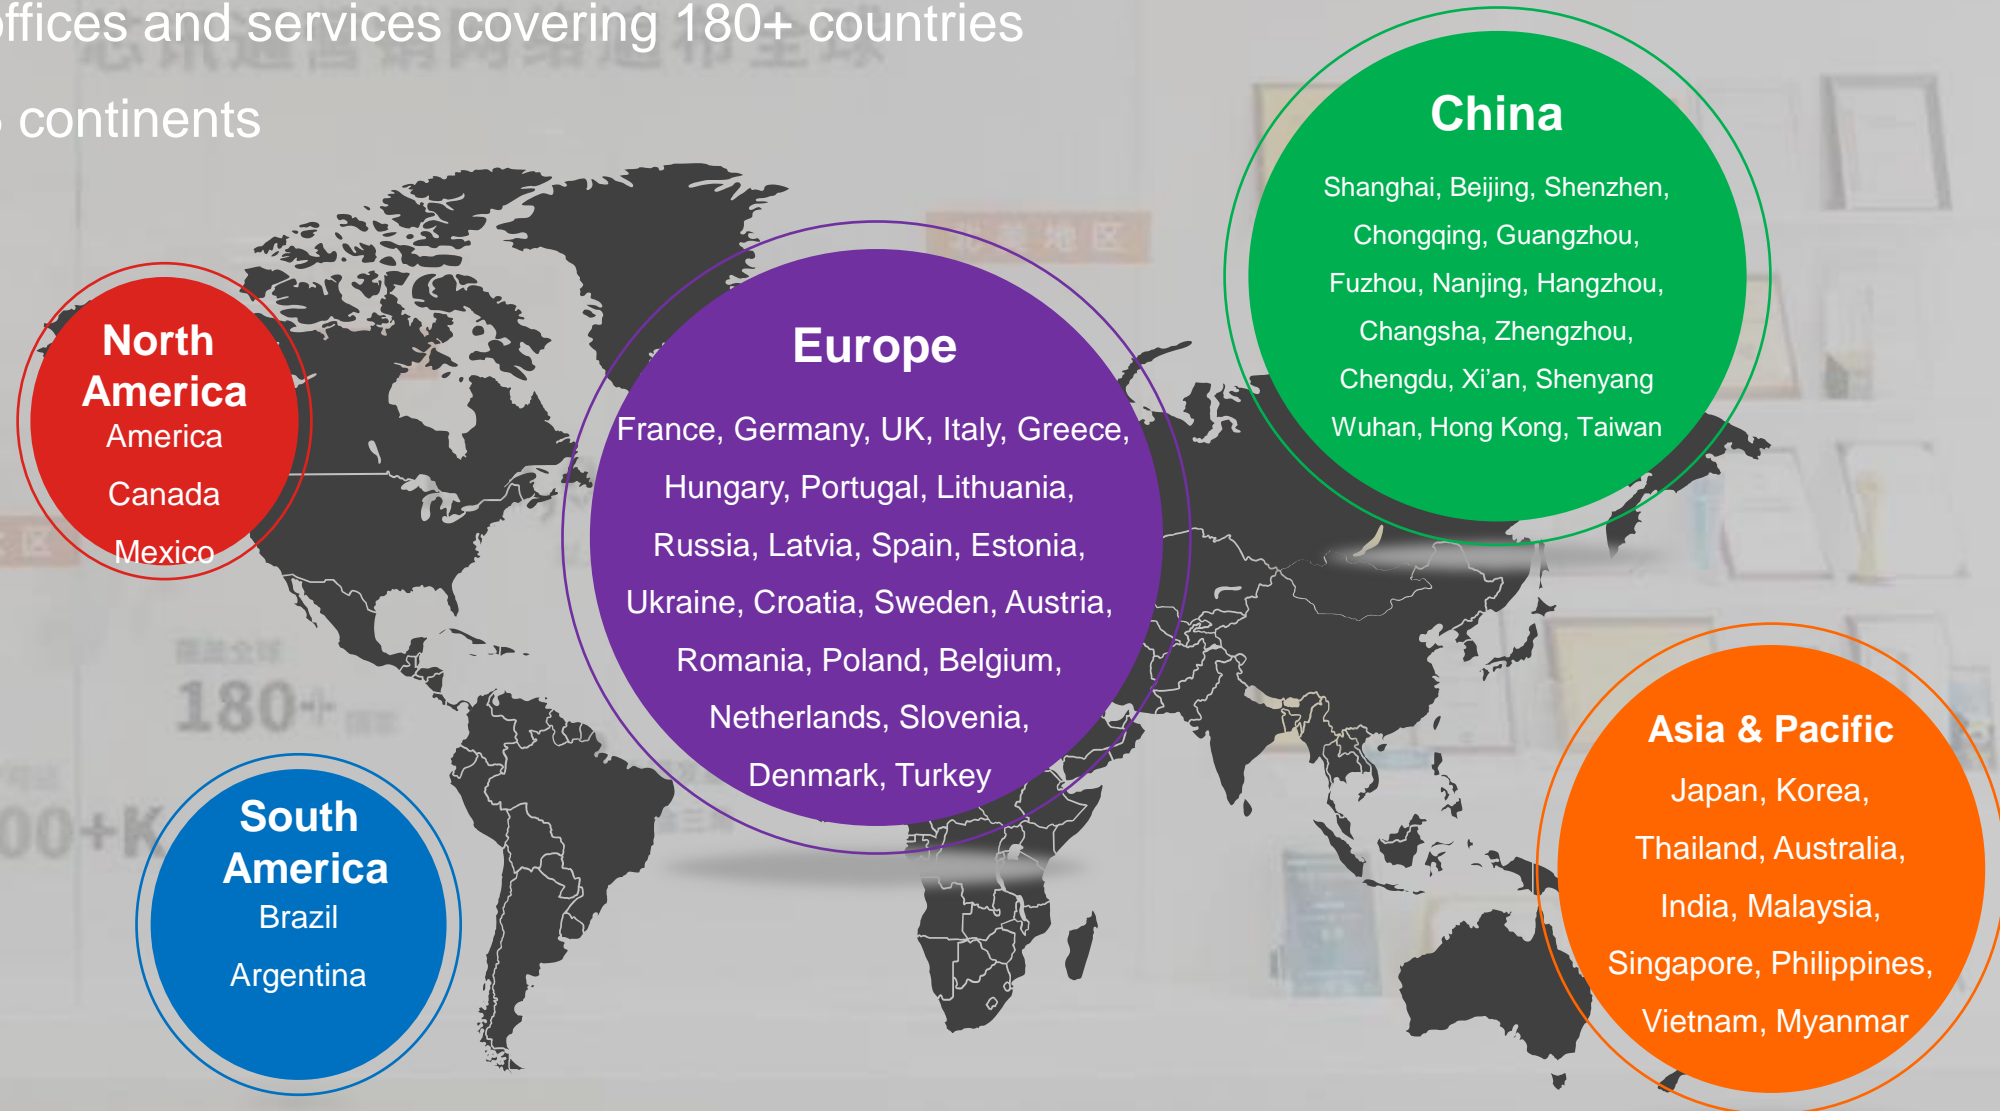

- Global Shipment ranked No.1 for 4 years consecutively;
- Established global 5G R&D Center;

- Moved to new SIMCom headquarter building.

# Worldwide Sales Network

30+ offices and services covering 180+ countries  
and 5 continents

# An Industry-Leading R&D Center

The 5G Innovation R&D Center, which encompasses more than **2,000** square meters, has world-leading experimental equipment and R&D environment plus a full set of 5G R&D equipment and testing instruments. It covers 5G (sub-6G & mmWave), LTE-A, 4G, NB-IoT, C-V2X, LTE-M, WiFi, GNSS and other technical fields as well as baseband/RF/audio performance testing, signal integrity analysis, reliability test, life testing, data-transmission testing, software/hardware performance testing and module certification testing as well as customer product tests, support for customer certification, etc.

# Automated Production

- Daily production capacity up to 300K
- Five factories

- The SIMCom factory has IATF16949, ISO14000 and OHSAS18001 certifications.
- A complete supply-chain management system guarantees product quality and supply.
- Automated production and efficient, automated testing ensure quality.

# Our Partners and Ecosystem

An extensive network of global partners means we can help customers promote and market globally.

## Chip Platform

## Technical partner

## Global regulatory certification

## Cloud platform

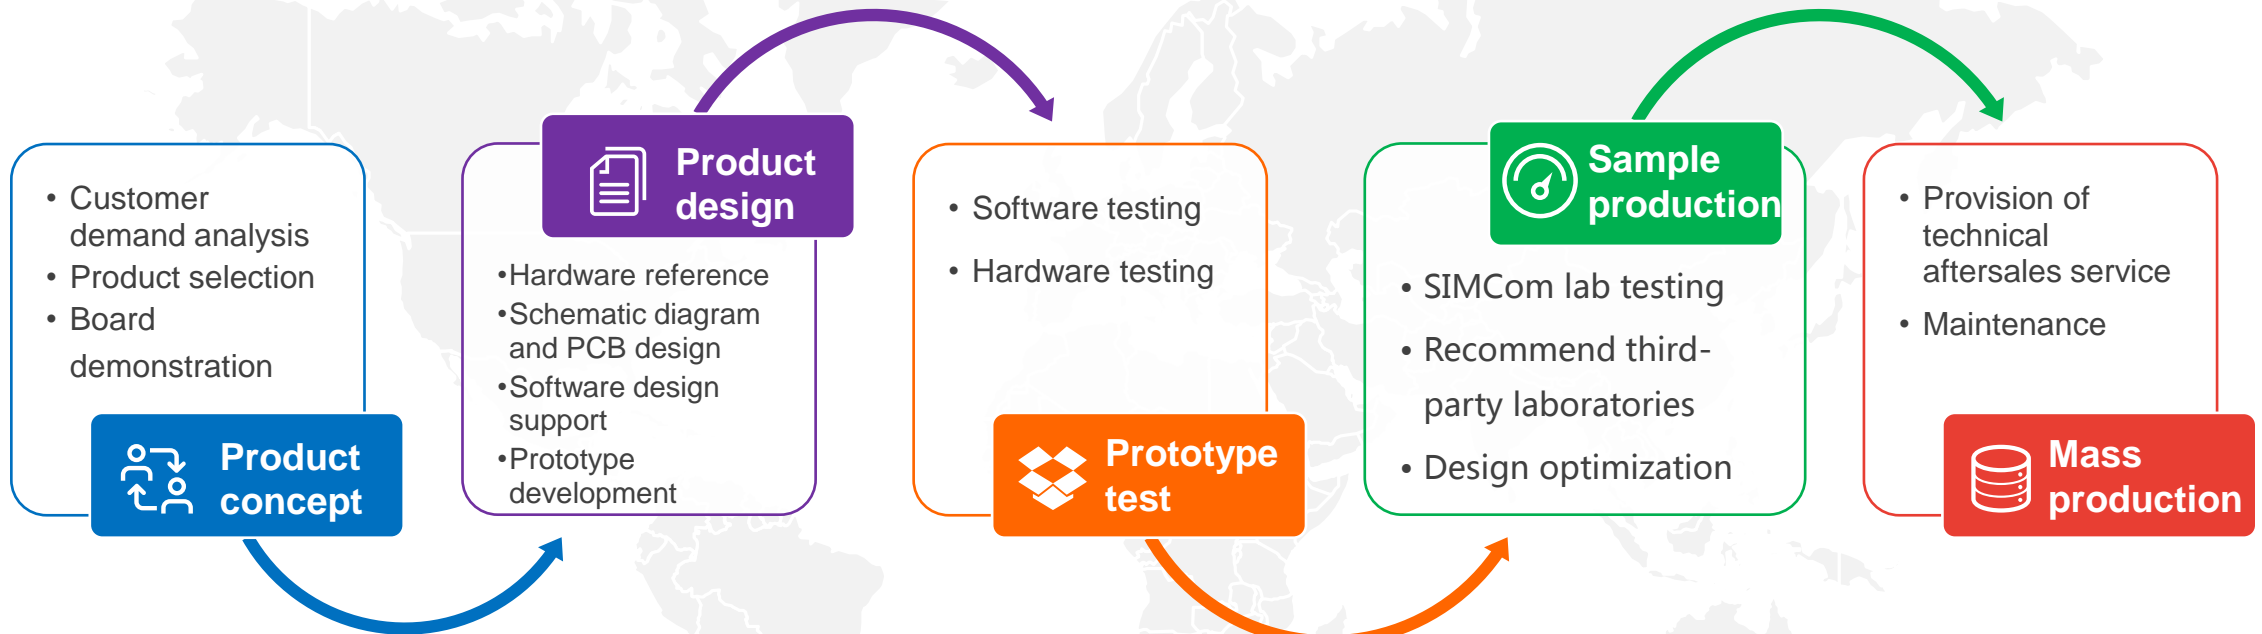

# Global Distribution of Operator Partners

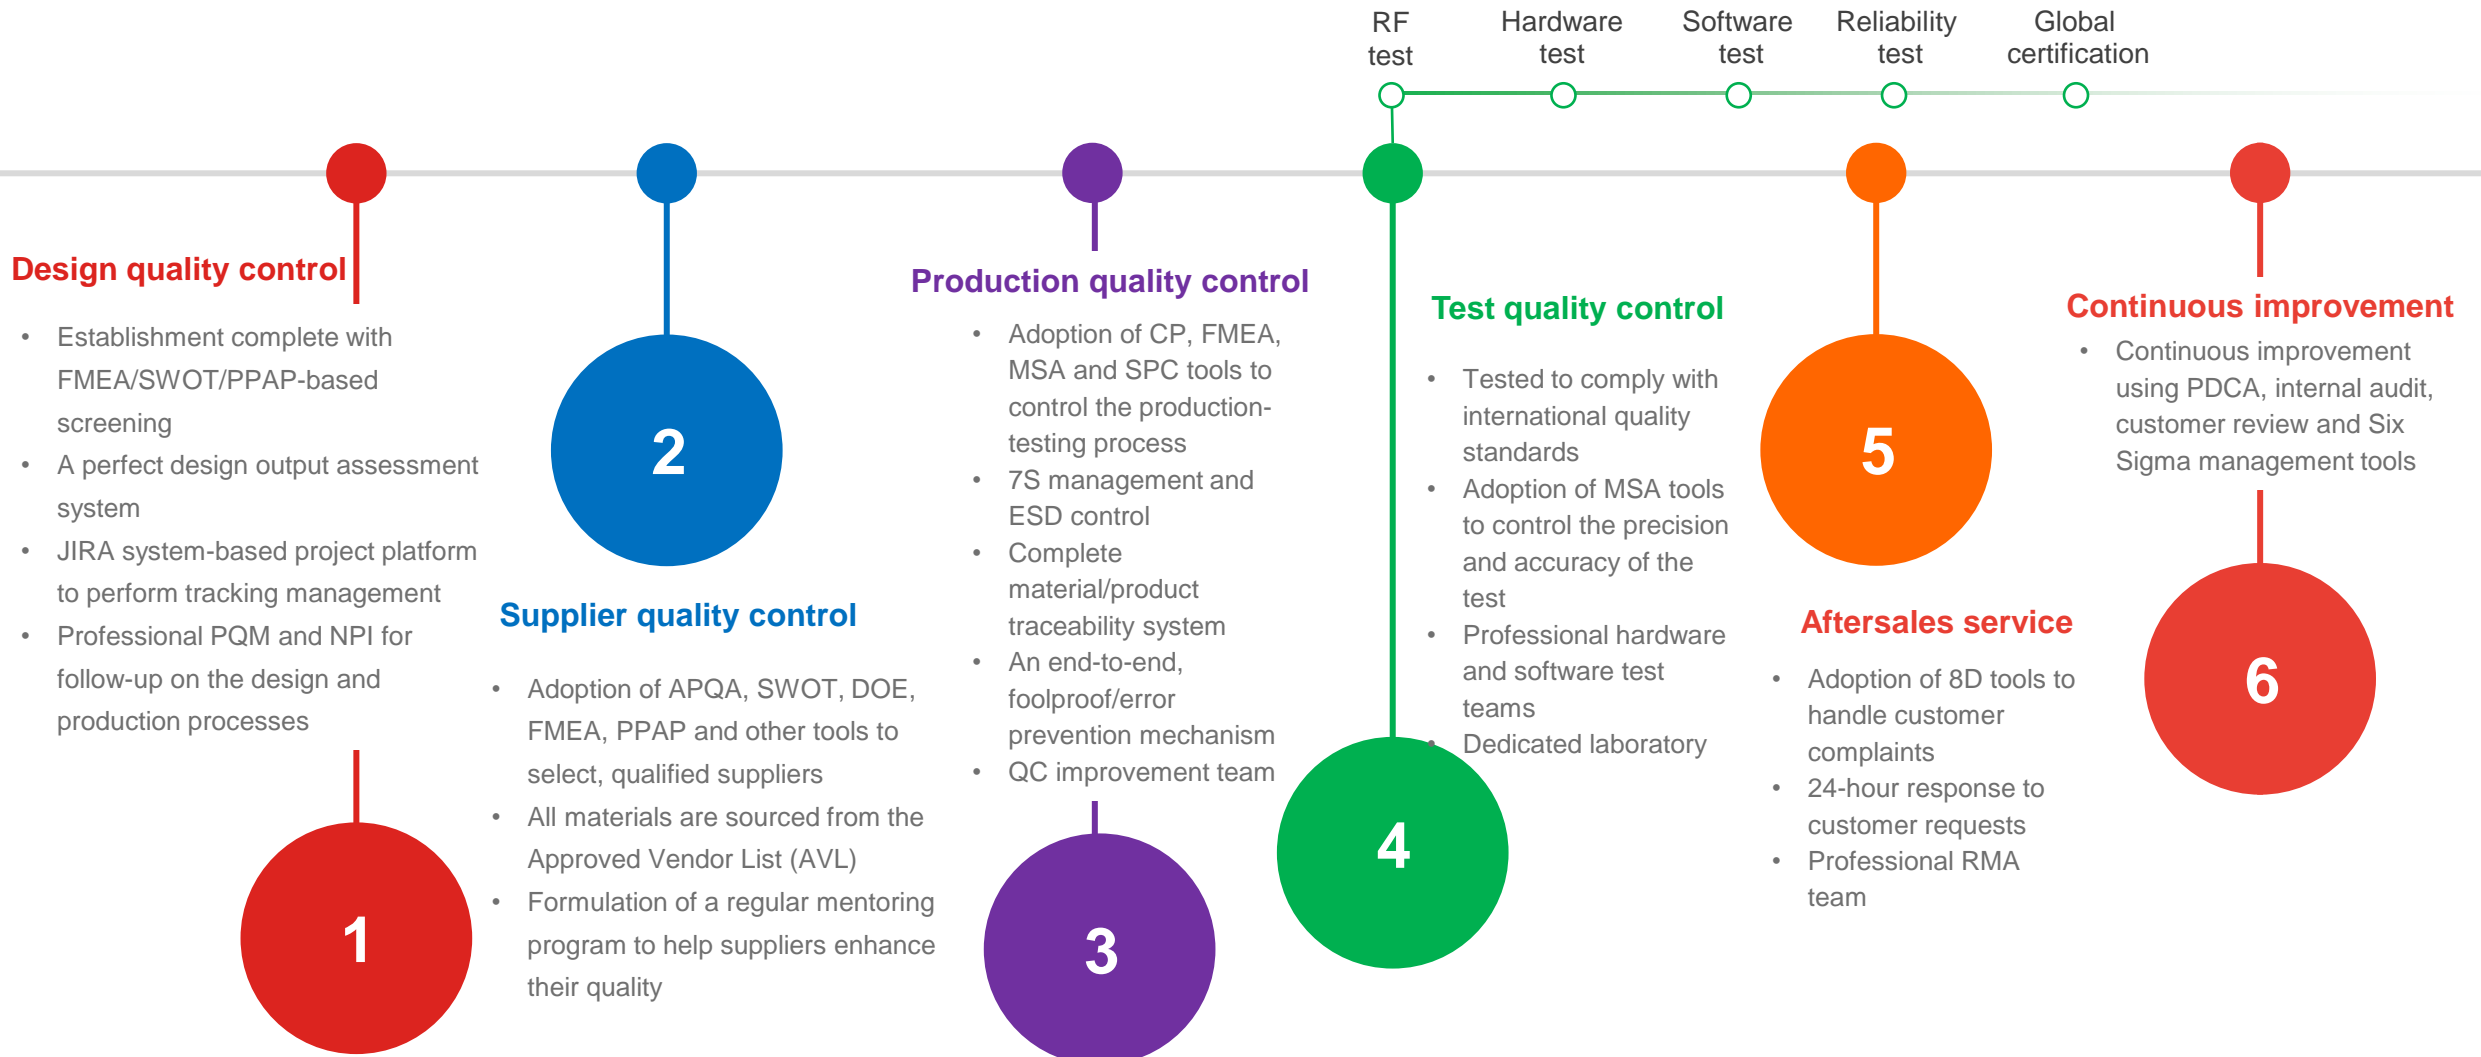

# All-round customer support service

“1+1+1” intimate service and technical support throughout the product life cycle.

# Product Quality Control

We strictly control product integrity and deliver high-quality modular products.

# At the Forefront of ICT Iteration

From 2G to 5G, SIMCom continues to release cutting-edge technologies, making it the leading global supplier in IoT solutions.

The company was established

Launched the first 2G module: ITM100;

Launched the first 3G module: SIM5320&SIM5360 series;

Launched 4G Cat.1& Cat.3 module: SIM7100&SIM7600 series;

Launched LPWA module: SIM7000&SIM70X0 series;

Launched C-V2X and LTE-A module: SIM8100, SIM7906, SIM7912 seri

Launched 5G module: SIM8200 Series

Launched an ultra-small 5G module SIM8202G-M2 and the first 5G module SIM8262G-M2 that supports the R16 standard ;

“SIMCom module products empower vertical industries”

# 5G

5G is a great leap toward the new era. It offers universal connectivity with higher transmission speeds than optical fiber as well as better real-time transmission than is available with industrial buses.

SIMCom 5G modules and solutions enable total industrial digitalization.

## Transportation

- Automated driving
- Remote driving
- Formation driving

## Healthcare

- Remote guided wave ultrasonic detection
- Remote endoscopy
- Remote surgery by medical robots
- Remote diagnosis
- Health bracelets

## Security

- Wireless surveillance cameras
- Patrol UAVs
- Power-system patrol robots
- Airport fence patrol robots

## Industry

- Wireless industrial cameras
- Industrial sensors
- Logistics and inventory monitoring
- Wireless cloud PLC

## Education/Entertainment

- VR/AR teaching
- 8K videos / cloud games
- Ultra HD / panoramic live streaming
- Laptops
- Smart homes
- VR/AR games

# Internet of Vehicles

The traditional auto market will be revolutionized, and the role of the Internet will transcend the traditional entertainment and assistance functions.

SIMCom on-board modules and solutions have become key driver of road safety and automotive innovation

## Information Service

- Dashboard cameras
- Intelligent multimedia all-in-one machines
- Vehicle-mounted T-BOX
- Vehicle anti-theft systems
- Tire-pressure monitoring systems
- Height/weight/width limit warning systems
- External environment sensing systems
- On-board self-diagnosis systems
- Automatic parking guidance and control systems
- Fleet management systems

## Transportation Efficiency

- Speed guidance systems
- Traffic information and path planning systems
- Crossroad assistance solutions
- Time-sharing solutions for dedicated lanes
- Road closure/temporary traffic control solutions
- Expressway lane-management solutions

## Safety and auto

- Fatigue driving monitoring systems
- Forward Collision Warning Systems
- Systems to warn of tailgating
- Intersection collision warning systems
- Road rescue solutions
- Solution for slippery/dangerous road sections
- Automatic light switching solutions when meeting oncoming vehicles

# Industrial IoT

Innovation is the soul of manufacturing.

SIMCom modules and solutions help intelligent manufacturing develop toward lean production, digitalization and flexible workflow and production.

## Production equipment monitoring

- Building management systems
- Warehouse and office monitoring and management systems
- Air conditioning and HVAC monitoring and management systems
- Fire safety monitoring systems

## Safety management in industrial production

- Intelligent safety helmets
- Intelligent personal protective equipment
- Ergonomic exoskeleton aids
- Predictive maintenance solutions

## Production process optimization

- High pixel camera visual systems
- Intelligent high precision screwdrivers
- Production line monitoring systems
- Outbound logistics monitoring systems
- Automated vehicles in workshops
- Industrial tablets
- Quality control solutions
- Asset tracking systems

A nighttime photograph of a city skyline with illuminated skyscrapers against a dark blue sky. The city lights are visible in the foreground and middle ground.

# Smart Cities

SIMCom modules and solutions are committed to promoting the deep integration of new-generation information technology and urban modernization while building a new type of smart city.

## Environmental security

- Intelligent access control monitoring and alarm solutions
- Groundwater level measuring systems
- Real-time bridge displacement monitoring systems
- Intelligent trash-bin detectors
- Intelligent manhole-cover monitoring systems
- Wireless smoke-detection and alarm systems

## Public Affairs

- Intelligent elevator systems
- Remote sensing solutions
- Smart weather solutions
- Open government and business data solutions
- Social video networking solutions
- Global map geographic information cloud solutions

## Transportation and logistics

- Smart street lamps/traffic lights
- Urban public-transport solutions
- Intelligent parking solutions
- Traffic safety solutions
- Smart logistics solutions
- Smart airport solutions
- Smart expressway solutions

# Smart Energy

SIMCom modules and solutions focus on building green, low-carbon, safe, efficient, modern energy systems.

SIMCom promotes the deep integration of energy and information as well as the development of new technologies, models and forms of business in the field of energy Internet.

- Smart charging solutions
- Intelligent meter reading solutions
- Integrated energy service solutions

- Smart energy-storage solutions
- Power data platform solutions
- Intelligent integrated systems for purchasing and selling electricity

- Power monitoring and management solutions
- Oil and gas exploration and development solutions
- Photovoltaic cloud network solutions

# Smart Retail

New retail challenges the limits of consumer experience and business efficiency. SIMCom modules and solutions are committed to industrial chain digitalization, creating smart retail solutions while boosting the digital transformation of retailers.

## Smart Shops

- Product identification AI
- Electronic price-tag devices
- Smart product management solutions
- Smart shop management solutions
- Automated customer analysis systems
- Inventory handling systems
- Loss-warning systems
- Product display automatic checking solutions

## Smart Shopping

- Mobile smart POS
- Smart shopping trolleys
- Intelligent coffee machines
- Face recognition payment
- One-stop smart vending machine solutions
- All-in-one bus payment solutions
- Shared travel payment systems
- Electronic price-tag devices
- One-stop smart vending machine solutions
- Intelligent shopping guide systems

# Thank you!
