## Empowering Innovation and Efficiency with Advanced Artificial Intelligence and Machine Learning Technologies

Capital Numbers is the preferred choice of Fortune 500 Firms, SMEs, Agencies and Startups to access India's top 1% software developers.

**Unlock the potential of AI and ML with our expert services. We offer custom solutions, data analytics, and automation to revolutionize your business efficiency and growth.**

### GenAI Development Services

Explore limitless opportunities with GenAI where we bring our deep technical knowledge around GenAI foundational models like GPT-4, Llama, PaLM2, DALL-E, Stable Diffusion, Bard, etc., to create high-quality apps, code, images, content, and more.

### AI and ML Integration

Our offerings also include integrating advanced AI/ML models into your legacy systems to fuel innovation and bring positive changes in how your organization interacts and operates.

### Robotic Process Automation (RPA) with AI

Whether you want to automate your simple back-office tasks or complex workflows, our certified developers can combine RPA with AI's cognitive ability to help you fulfill all kinds of tasks without lag.

### Data Science Consulting

Automate and operationalize your Data Science models with our AI models. Our AI and Data Science consultants can combine the two techs to automate your data interpretation and decision-making process.

### Custom AI and ML Software Development

You can get tailor-made AI/ML services from our experienced developers. We custom-build AI/ML solutions to perform unique tasks like data classification, pattern recognition, and transformation specific to your requirements.

### Voice Recognition and Processing

We understand that the voicebot revolution is in full force. So, we leverage the power of voice tech to develop intelligent verbal interfaces that can naturally simulate human-like responses to people's queries.

### Computer Vision Services

We can help you tap into the potential of visual automation by developing computer vision systems like facial recognition apps, barcode scanners, etc., that can classify the tiniest of details from video/audio/image files.

### AI-Driven Business Intelligence

With our experienced developers, you can also implement AI in your BI systems. We have hands-on expertise in developing AI models that help with predictions, 'what-if' scenarios, insights, and recommendations.

**Transform your project vision into an exceptional digital product.**

### AI and ML Consulting

As a leading software development company with a decade-long experience, Capital Numbers is skilled at helping clients apply practices and strategies surrounding responsible AI implementations.

### Deep Learning Solutions

We deeply understand the intricacies of AI/ML models. So, we know what it takes to build, fine-tune, and deploy advanced deep learning algorithms that learn by experience and uncover tremendous business opportunities.

### Natural Language Processing (NLP) Services

Leverage our advanced NLP Services to streamline communication and data analysis. Our offerings include intelligent chatbots, sentiment analysis, text categorization, and language translation.

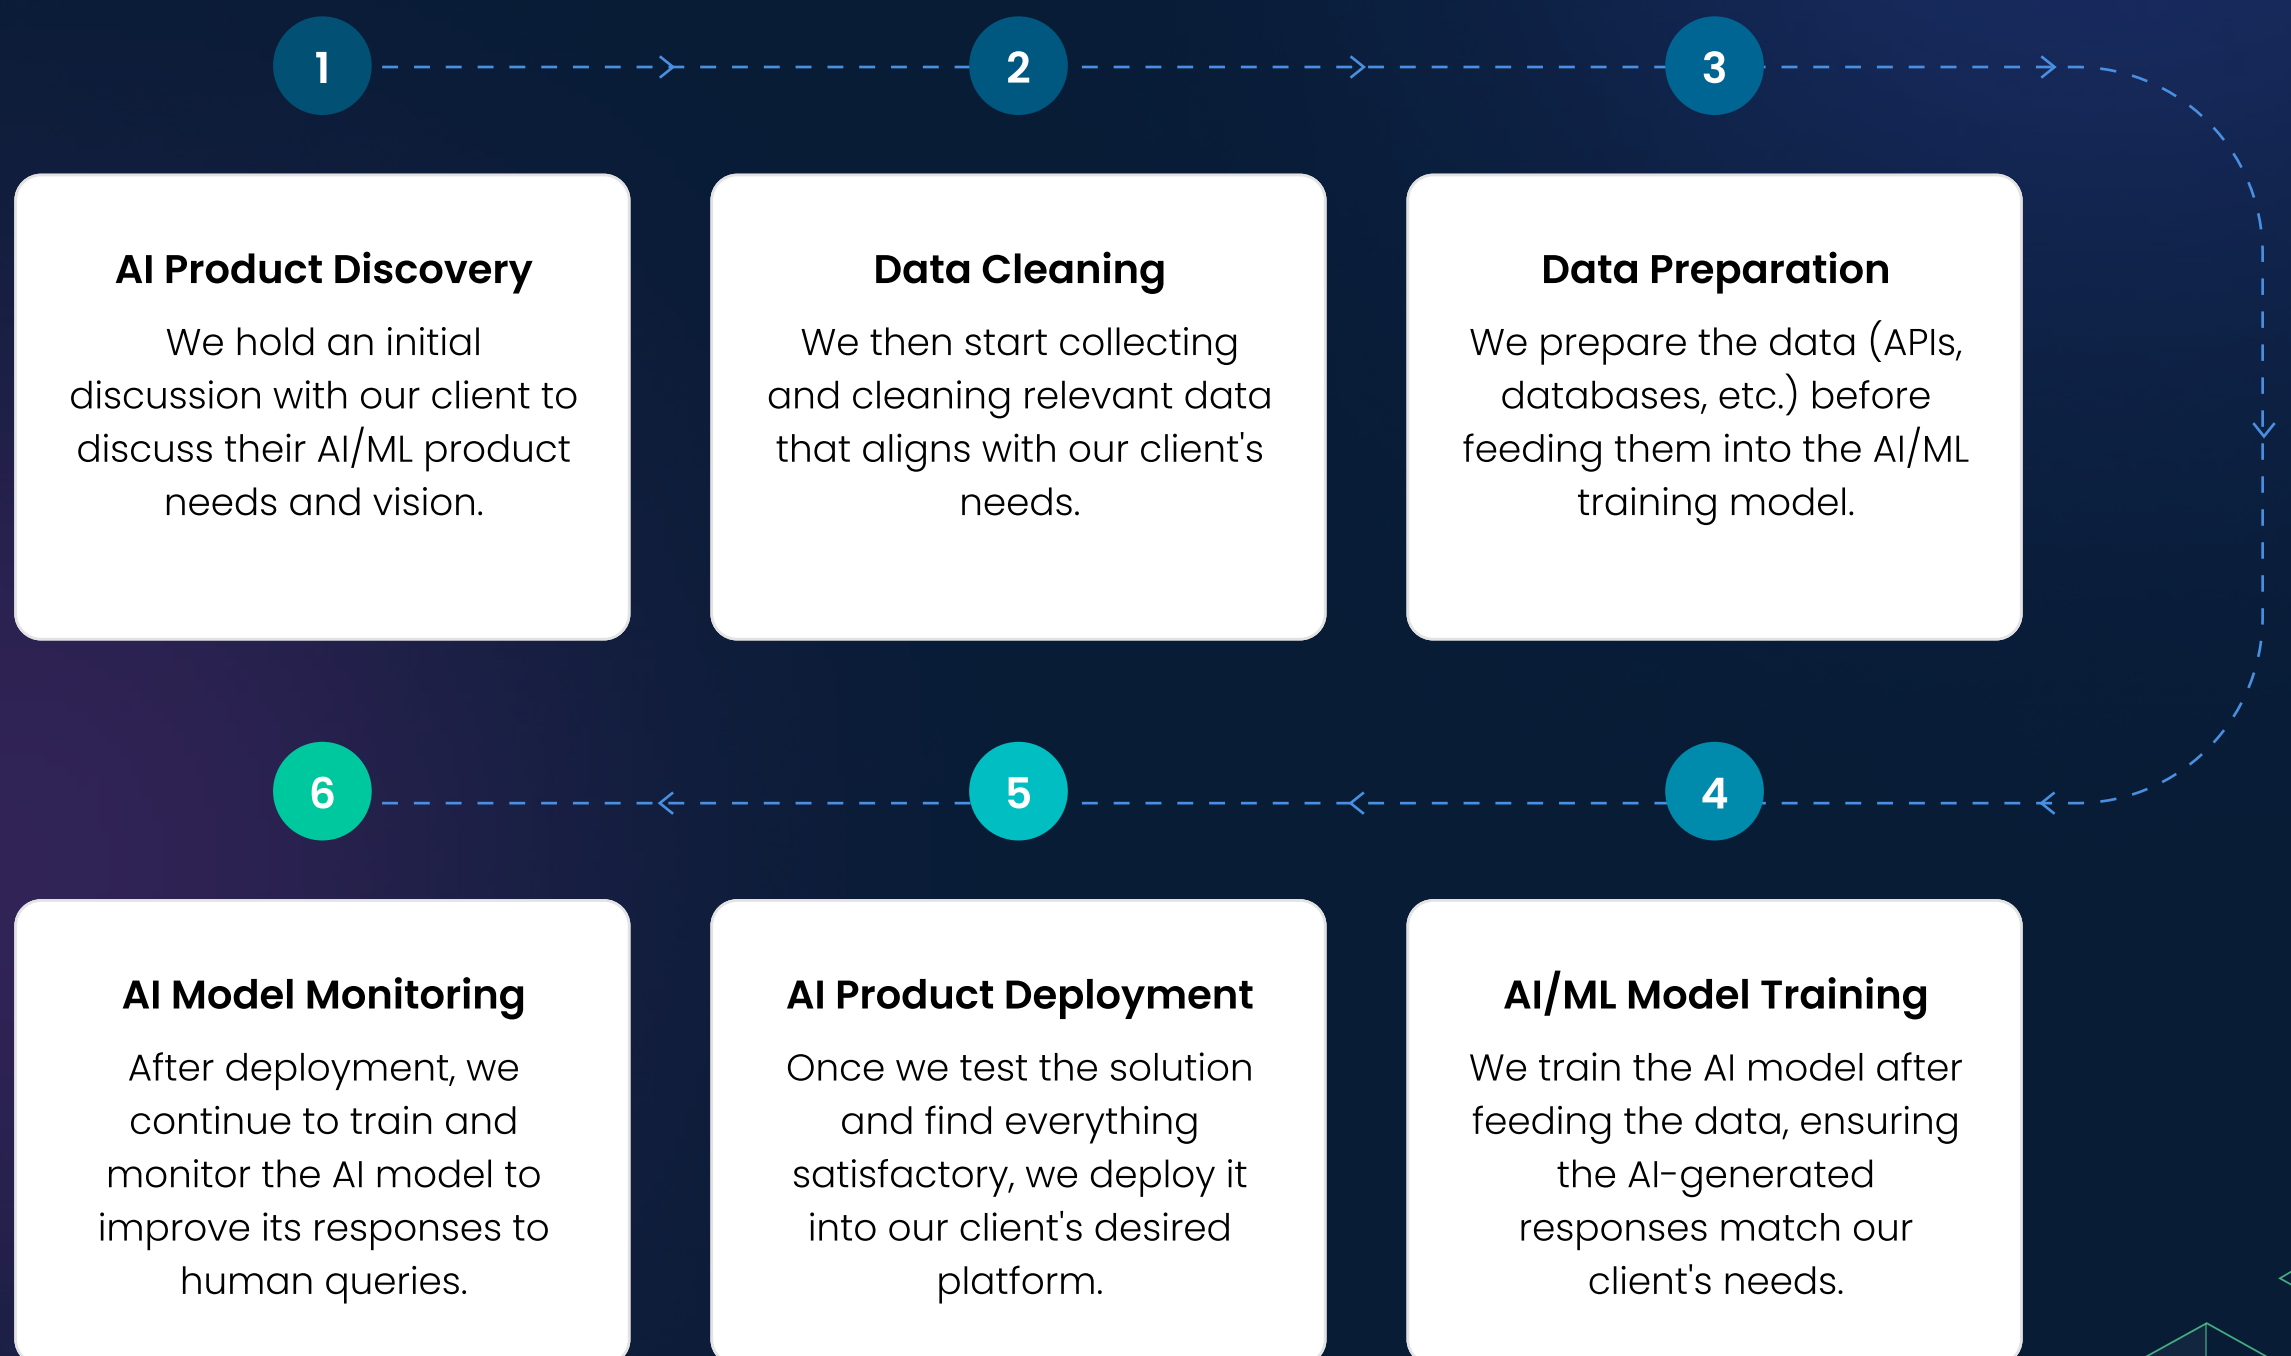

### AI and ML Cloud Services

Save on operational costs with our AI/ML cloud services that can heighten processing capacity, automate low-level service requests, infuse flexibility, eliminate human error, and reduce your IT infrastructure expenses.

## Our AI and ML Development Process

# Our AI and ML Use Cases

Capital Numbers can help you adopt AI and ML solutions at scale in areas like:

**Marketing & Sales**

**Education**

**Healthcare**

**Banking & Fintech**

**eCommerce**

**Data Science**

**Smart Utilities**

**Cyber Security**

**Recruitment & HR**
