Custom eCommerce Development Services for Creating Unique Online Shopping Experiences

Capital Numbers is the preferred choice of Fortune 500 Firms, SMEs, Agencies and Startups to access India's top 1% software developers.

Experience seamless, feature-rich eCommerce solutions that boost conversions and propel your brand ahead of the competition with our expert development services.

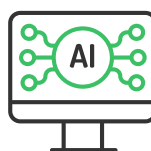

Custom eCommerce platform development

This involves building a bespoke online store from scratch, offering complete control over features and functionality. Key technologies: Programming languages like Python, Java, PHP, Ruby; Frameworks like Django, Spring, Laravel, Ruby on Rails; Content Management Systems (CMS) like Drupal, WordPress.

eCommerce platform customization

Modifying existing e-commerce platforms like Shopify, Magento, BigCommerce to fit specific needs. Key technologies: Platform APIs, custom plugins and extensions, front-end development frameworks like React, Angular, Vue.js.

Artificial intelligence (AI) and machine learning (ML)

Utilizing AI and ML for personalized product recommendations, chatbots, and dynamic pricing.

Theme design and user interface (UI) development

Creating visually appealing and user-friendly interfaces for online stores. Key technologies: HTML, CSS, JavaScript, UI/UX design tools like Figma, Sketch, Adobe XD.

Shipping and fulfillment integration

Automating shipping and fulfillment processes with logistics providers. Key technologies: Shipping APIs, fulfillment software, order management systems.

CRM and ERP integration

Linking eCommerce stores with CRM and ERP systems for streamlined customer relationship and resource management. Key technologies: CRM and ERP APIs, data synchronization tools.

Headless commerce

Decoupling the front-end and back-end of eCommerce platforms for greater flexibility and scalability.

Voice commerce

Enabling shopping through voice assistants like Amazon Alexa and Google Assistant.

Payment gateway integration

Enabling secure online transactions with various payment methods. Key technologies: Payment gateway APIs, secure coding practices.

Marketing and analytics integration

Connecting eCommerce stores with marketing and analytics tools for data-driven insights and optimization. Key technologies: Marketing APIs, analytics platforms, data management systems.

Transform your project vision into an exceptional digital product.

3 Steps To Build Your Custom Team Of eCommerce Developers

1

Choose eCommerce Developers

We have a team of 100+ eCommerce developers. You can interview and shortlist candidates from our in-house tech pool and decide who joins your team.

2

Integrate Team into Your Projects

Our developers have now become a part of your team. They work dedicatedly for you, and you can communicate with them directly. You can start assigning them tasks and get daily updates along with a timesheet.

3

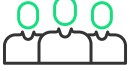

Scale On-demand

We also let you scale on-demand, grow your team during high-volume periods, and ramp down team size when needed. In short, we make it easy for you at every step like a true partner on whom you can rely.

Why Choose CAPITAL NUMBERS?
