

Comprehensive Solution for Planning, Sending, and Monitoring Individual or Bulk SMS

WebSMS is available as *Web portal*, *Api SMS* and *Email gateway*

Description

This solution provides you with a powerful and efficient system for reaching out to your audience whether they are customer, employees or users, in different ways:

- **Web portal:** a portal for desktops that does not require any installation. You can set different access levels and user permissions
- **Api SMS:** to easily integrate with your business application
- **Email gateway:** allows you to use the platform as a simple gateway to convert your emails into SMS

Benefits

Safe, immediate and fast

Receiving SMS is not limited by data traffic and it's accessible to anyone who owns a mobile phone

Smart management

You can independently plan and manage SMS communications to customers and employees

Traceable results

You have the confirmation of SMS sending and delivery

Funcionalities

Instant delivery of individual SMS

Scheduled and automated sending

Sending bulk SMS to one or more contact lists

History of the delivery status of all messages
