Telecom Expense Manager (TEM)

technacy
EVOLUTION IN MOBILITY

Simplify Telecom Expense Analysis and Allocation

A platform that provides an overview of invoices and the cost allocation of mobile and fixed telecommunications

Description

Telecom Expense Management platform offers a complete solution for processing and managing **mobile and fixed invoices** for companies of all sizes. The platform makes it easier to analyze costs, compare expenses and trends, and keep track of all invoice elements.

The Premium package has additional features, such as detailed reports, analysis and data export capabilities; it includes a specific module for human resource management, which simplifies the efficient management of HR management.

Benefits

Autonomy in understanding the invoices

Thanks to the simplification and consolidation of information you check invoices and excess expenditure

Time-saving

Reduce the calls to customer care and simplify the association between employees and costs

Spending control

By analyzing the costs of fixed and mobile lines, dividing them into cost centers

Funcionalities

Overview of cost trends in the months

Automatic breakdown into types of costs and distribution

Detail of each individual invoice item

Management of cost centres

Reports per month and per invoice

Advanced and customizable reporting to compare multiple invoices
