

## Enhance your Company's Global Mobility with our Roaming Solution

We provide you with a personal web portal to access and purchase data traffic profiles for any country you need

### Description

Sim4Business is a dashboard that facilitates the purchase of prepaid traffic profiles for your employees, allowing you to choose from a variety of countries.

The data traffic is provided through virtual SIM cards (eSIM) which can be easily activated on your employees' devices by scanning a QR code.

### Benefits

#### Total control

Manage and monitor in real-time all eSIM from a single platform

#### Simple purchase

You can purchase the foreign data traffic whenever you need it and receive a unique invoice to pay at the end of the month

#### eSIM fast top up

If you have already purchased an eSim and need to request more data, you can buy them directly

#### Cost containment

You can monitor the real-time consumption

### Funcionalities

-  Different bundles of data traffic
-  Profiles available for different countries or regions
-  Direct top up of the eSIM
-  Consumption monitoring
-  Purchase history
-  Traffic is activated when the eSIM connects to the supported provider
