# wait4call

A full experience for the user base

A white-label solution for digital audio advertising that can be integrated with whatever corporate App

Features

A **complete solution** that allows you to integrate an extended selection of functionalities, designed to simply update every company's proprietary App through a personalizable **SDK**

The main feature is the implementation of an innovative, unexplored digital **AD channel** that allows the broadcast of a short **audio AD** to the user during the **call waiting time**

User Activates the service on your APP → **Listens to an Ad they like** → **Gets a Reward** → **Spends the rewards within the App**

Maximize Profits

by selling AD spaces on your exclusive audio channel

Retain Customers

through personalized ads and rewards

Personal backend

to monitor and manage all the feature

AUDIO AD   **VIDEO AD**   **WALLET**   **COUPONS**   **GAMING**
