

# Sensing, anywhere.

Simple, secure & ultra low-power space-enabled connectivity, purpose built for the Internet of Things.

Only 10% of the Earth's surface can be monitored with existing communication technologies

Source: Berg Insight

No global coverage

No ability to monitor, maintain & manage our:

## The solution

With Myriota gather insights when and where you need to, to make decisions for your business that matter.

## Features

-  Low-power devices
-  End-to-end secure data
-  Geolocation PNT Alternative
-  Pole to pole coverage
-  Massively scalable

## Why Myriota?

Myriota's revolutionary satellite communication technology delivers:

**50x**  
Reduction in Total Cost of Ownership

**10-120x**  
Battery life increase

**Zero**  
Compromises, end-to-end secure

Since launch in 2015 Myriota's mission has been to realise the full potential of global connectivity with direct to satellite sensing.

-  Go global with 0 delay
-  Get new markets
-  Work with existing hardware
-  Proven security

# Simple to validate, fast to market

## Validate

Move quickly from testing to field trials with our Dev Kit.

## Design

Bring your own device or use off-the-shelf hardware.

## Deploy

Deploy your devices, globally.

## Impact at scale

Unlock new markets and impact at scale.

## A thriving ecosystem

### Key customers

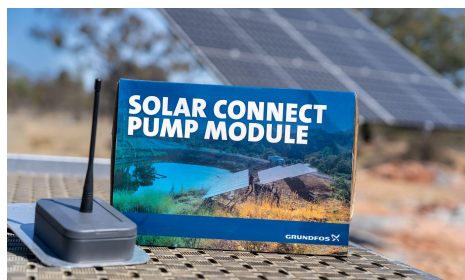

### Key partners

## Deployed & proven

Our products are deployed and proven in demanding environments where connectivity matters.

### Agriculture & Environment

18m pumps p.a.

“The partnership has enabled us to bring a unique solution to market, allowing customers to monitor their complete water asset. Our ambition is to continue to bring these benefits to our customers on a global scale.”

### Gas & Utilities

Hyperscale tank monitoring

“Deploying on the Myriota Network has enabled us to get connectivity everywhere, and to meet the needs of the most remote places, giving clear access and visibility to asset performance.”

### Government & Defence

Minister for Defence Industry

“This technology has the potential to be used beyond Defence and impact all sectors of the Australian economy. Myriota's secure satellite communications technologies will provide global connectivity.”
