Transform your team's language learning with Preply's AI Teaching Assistant

Elevate your team's language learning experience with Preply's cutting-edge **AI Teaching Assistant**. Tailored to drive employee success, our AI-powered tool transforms language training into a personalized journey, enhancing productivity, retention, and overall performance.

Tailored for employee success

The AI Teaching Assistant is an interactive tool that allows tutors to create exercises personalized to their students.

Preply's AI Teaching Assistant creates:
- Spoken and written exercises
- Grammar explanations
- Conversation starters
- Homework and lesson planning

The AI Teaching Assistant allows tutors to **focus on higher-level teaching responsibilities**, such as connecting with students in 1:1 conversations, explaining idiomatic nuances, and providing industry-specific or culture-specific context, offering a more enriching educational experience.

AI has been making quite a big impact on the relationship between tutors and learners:

"It is an easy and quick way to keep students engaged and assists them in a fun way."
- tutor using AI Teaching Assistant

The perfect blend

The success of this tool lies in the **synergy between Artificial Intelligence and Human Intelligence**. Tutors actively engage in refining and enhancing the AI output and the result is a personalized and effective learning experience that combines accuracy, relevance, and an unparalleled level of engagement.

Crafted with methodology

Every piece of **AI-generated content is built on top of Preply well-defined pedagogy**, a proven learning methodology which helps employees learn languages **18% faster** than the traditional approach. Help your employees take a meaningful step forward in their language skills with Preply's AI Teaching Assistant
