

**Powerful 4G/5G achieving sufficient Coverage & Quality.
Our partnership with SpaceX further enhances our cellular
connectivity to areas beyond traditional 4G/5G networks.**

Connecting Everyday Life

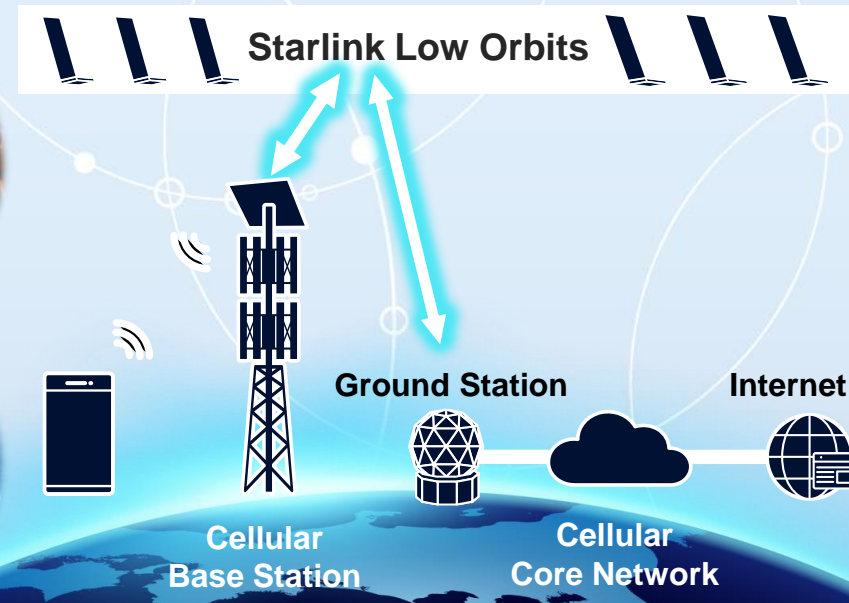

99.9%+
Population already covered.

Connecting the Extraordinary

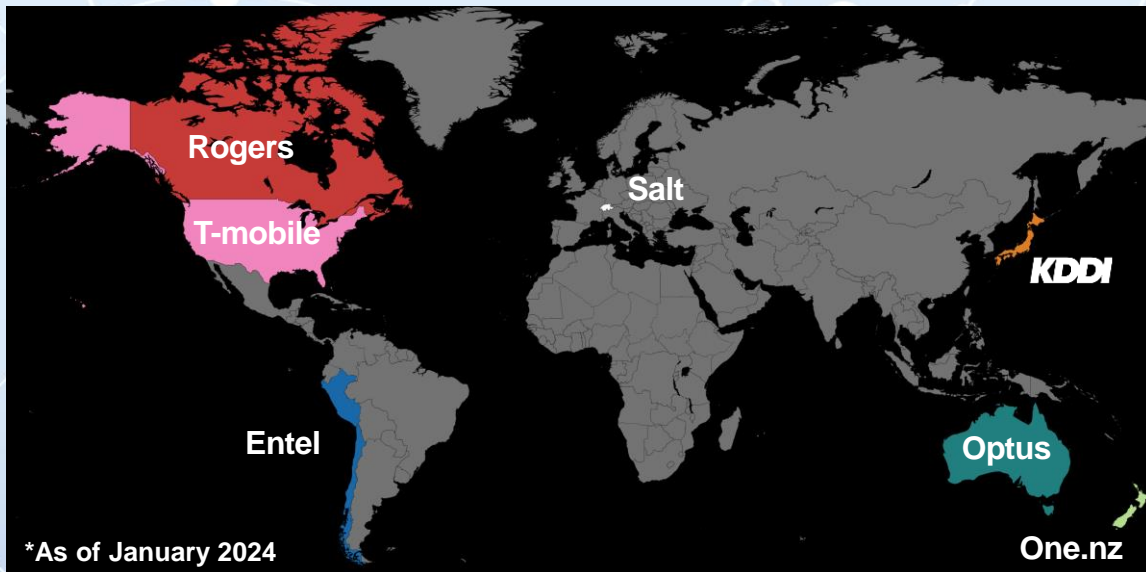

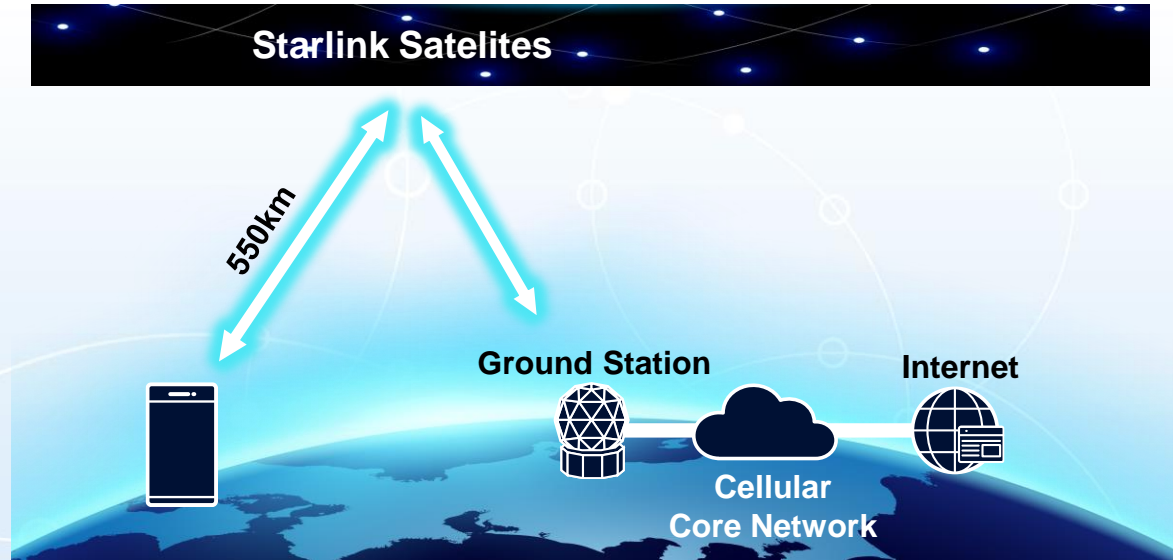

**Utilizing Starlink as a backhaul for our
cellular network has been ongoing
since December 2022.**

Connecting the Unconnected, wherever you see the sky

Starlink's next-generation satellites enable "Direct to Cell" service, facilitating seamless communication directly between satellites and smartphones.

Starting with SMS service in 2024, voice and data services will be supported sequentially. Global partners are also expanding sequentially.
