

Advanced and Customed **Technology** for Mobile Telecommunication Needs

We specialize in mobile technology, which we enhance and adapt to meet the needs of Companies, MNOs and Partners, transforming it into solutions that facilitate mobile work.

Asset Management

A solution that allows you to independently manage corporate assets through a centralized web platform.

Data Traffic Management

A web platform for managing and monitoring real time national and roaming data traffic of corporate SIM cards. It's suitable for businesses of all sizes and sectors.

eSIM Purchasing and Management

A flexible solution for companies needing temporary data packages: easily purchase prepaid data profiles for traveling employees and monitor their usage.

MDM Solution

A comprehensive solution for tracking, remotely controlling, and monitoring any company-owned or BYOD device by separating work and private profile.

SMS Sending Web Platform

A powerful and efficient Solution for SMS planning, sending and monitoring. It's available as Web Portal, API SMS and Email Gateway.

Digital Audio ADV Solution

A white-label digital audio advertising solution that integrates with any App. Its key feature is broadcasting a short audio ad to users during the phone call waiting time.
