ADOC SC01

Design with lid, double display and large keys, specially designed for the elderly, which stands out for its ease of use.

This terminal features a numeric keypad, a 2.4" color display and SOS button. In addition, it includes a long-lasting battery and a base for easy charging.

ADOC SC04

Telephones for the elderly are designed to be easy to use, with large buttons and high-contrast displays.

Include features such as speed dial and SOS emergencies to contact family members or emergency services quickly. They offer simplified interfaces, amplified audio and hearing aid compatibility for a better listening experience.

ADOC SP1

Specially designed for seniors elderly people, which stands out for its simplicity of use.

This terminal features a numeric keypad, a 2.4" color display and SOS button. In addition, it includes a long-lasting battery and a base for easy charging.

ADOC V4

Compatible with the Telecare service, it enhances the safety and autonomy of the elderly.

It has an external antenna to increase a wider range of mobile signal reception.

ADOC TM9

9-inch medical tablet with Android 11, with the possibility of hanging on the wall thanks to the VESA system.

It allows healthcare professionals to access patient data, update records and collaborate with colleagues on the go.

ADOC BE01

SOS Bracelet: This portable device connects to your phone and allows you to make calls to your emergency contacts with the push of a button.

contact.
