Host

imap.gmail.com

Client

An internet service provider based in Switzerland. Since the mid-1990s, the company has offered technical services like broadband internet access on ADSL / ADSL2+, VDSL, SDSL, and fiber-to-the-home (FTTH); VoIP, traditional landlines and virtual PBX; housing and hosting, etc.

Challenges

The client's contact center agents were overloaded with customer requests. They required a software solution to optimize time needed to process the requests and offer their subscribers more transparency and control over the tariffs.

Built with XME.digital

- User-friendly and flexible self-service portal
- Traffic usage dashboards & statistics
- Invoice management
- Seamless integrations with:
 - Product catalogue
 - Warehouse management
 - Mobile number operator
 - 3rd-party billing system

Results

23%

Less load on customer support

15%

Higher customer satisfaction rate

NEW

The new updated self-service portal coming in 2025
