

# obvios. Dome

## Antifragile private 5G

### → Dome Core

#### Dome Core

- Standalone (SA) private 5G network core solution, compliant with the 3GPP standard
- Cloud-native highly resilient software architecture
- Easy installation on various hardware, on cloud data centers, on small transportable platforms, on edge servers
- Sovereign private 5G solution
- Secure development processes

### → Dome Intelligent Security

#### Dome Intelligent Security

- Reinforcement of the security of the private 5G network against cyberattacks
- Continuous threat detection, analysis and automated mitigation of cyberattacks
- Detection of common and known attacks using signature-based methods
- Detection of Advanced Persistent Threats
- Integration in Security Operation Centers over data bus
- Detection of Distributed Denial of Services (DDoS) attacks on the radio networks
