

# AISWare AI<sup>2</sup> Edge Intelligence

**AISWare AI<sup>2</sup> Edge Intelligence** is designed for edge intelligence scenarios across various industries, utilizing integrated software and hardware devices to assist customers in achieving digital transformation.

## Overview

### Product Positioning

AISWare AI<sup>2</sup> Edge Intelligence is a crucial element within AsialInfo Technologies' Cloud-Network-Edge-End product ecosystem. It offers a variety of solutions, including cloud, edge, and cloud-network-edge-end combinations, to meet the diverse requirements of different industry customers and partners concerning factors such as latency, cost, and scene complexity.

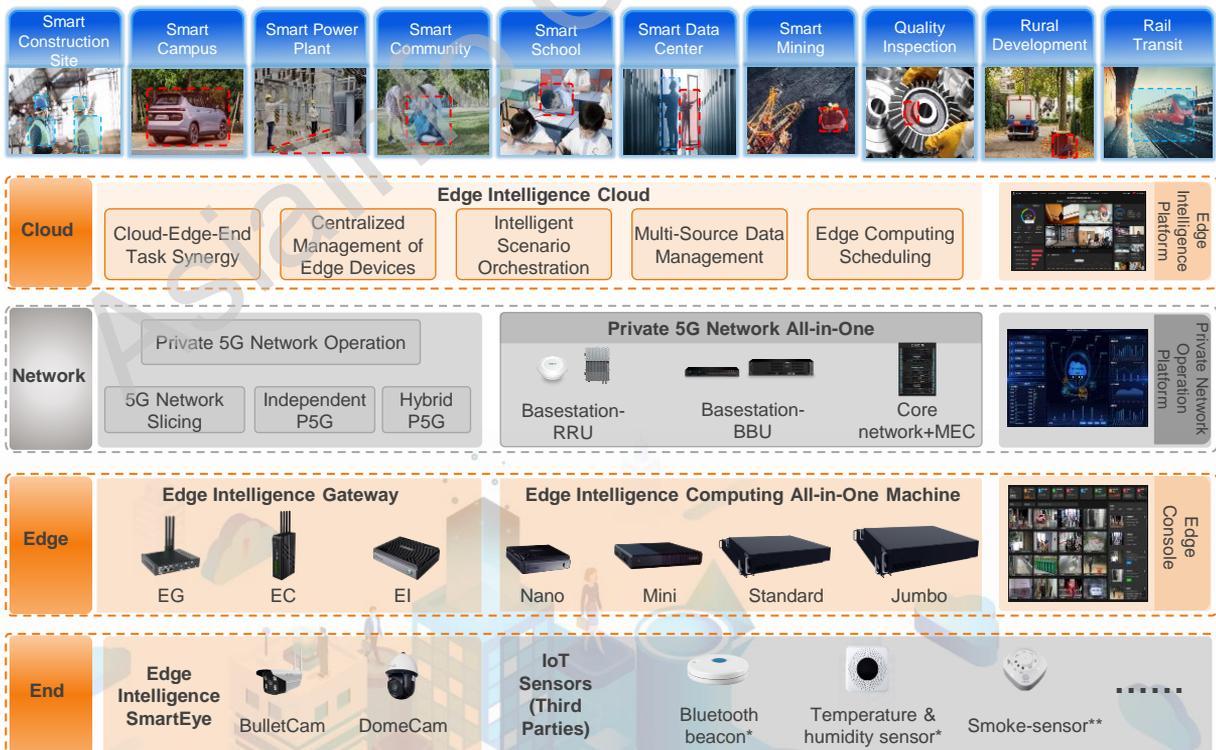

### Target customers

Empowering various industries including security, energy, telecommunications, campus, and manufacturing.

### Product Definition

AISWare AI<sup>2</sup> Edge Intelligence products encompass AISWare AI<sup>2</sup> Edge Cloud, AISWare AI<sup>2</sup> Edge Gateway, AISWare AI<sup>2</sup> Edge SmartEye, and AISWare AI<sup>2</sup> Edge Intelligence Computing All-in-One Machine. Through cloud-network-edge-end collaboration, these products apply edge computing, AI, and IoT technologies to various industry-specific edge scenarios, assisting enterprises in achieving intelligent upgrades and realizing cost reduction and efficiency improvement.

## Product Portfolio

## Unique Advantages

### Ubiquitous Intelligence

Possessing rich capabilities for industry-specific intelligent scenarios:

- Multiple-source perception terminal access
- Multi-dimensional perception data fusion
- Focus on industry-specific scenarios

### Comprehensive Collaboration

Offering comprehensive cloud-network-edge-end collaboration capabilities:

- Full-Stack Edge Intelligent Products
- Diverse network connection methods
- Support for integrating third-party products

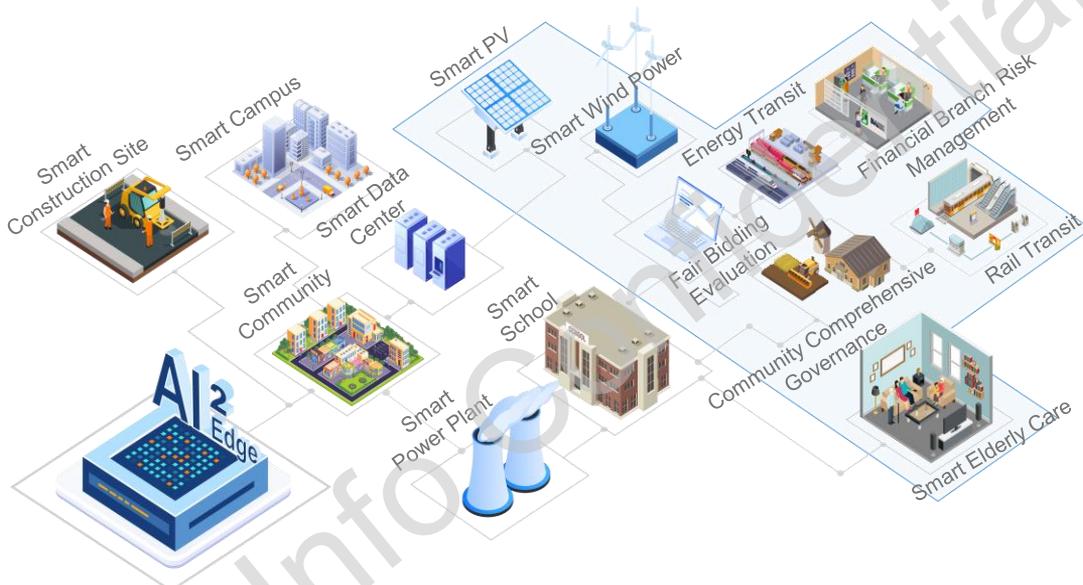

### Ultimate Efficiency

Providing highly efficient AI integrated products:

- High efficiency
- Simplified O&M
- Stable operation

## Application Scenarios

AISWare AI<sup>2</sup> Edge Intelligence is applicable in various industry scenarios, including construction sites, campuses, power plants, schools, transportation, elderly care, etc.

## Certificates & Awards

China Compulsory Certification (CCC) of AISWare AI<sup>2</sup> Edge All-in-One Machine

China Compulsory Certification (CCC) of AISWare AI<sup>2</sup> Edge Server

CNAS Third-Party Testing Report

French Design Award – 2023 Gold Award

Demonstration case of National Advanced Zone for AI Innovation and Application

Outstanding Edge Computing Solution Award

Certificates

Awards

## Use Cases

AI Video Security in a Technology Campus | AI Video Analytics Platform of Telecommunications Operator | Unmanned Substation in a Renewable Energy Power Plant
