

savefamily

Secure digital technology
for families

Independence · Safety · Fun

SaveFamily was founded in 2018 with a clear purpose:

To offer **safe digital technology for children and dependent people.**

Our mission is to facilitate communication and connection between family members, providing peace of mind through innovative solutions that promote the safe development of children and the autonomy of older adults.

At the heart of SaveFamily are our **GPS smartwatches for children**, a responsible alternative to a first mobile phone that combines freedom, entertainment, and adapted education with the security parents need.

With the acquisition of Neki, a company specialized in smartwatches for seniors and dependent people, we strengthen our commitment to care, safety, and autonomy for those who need it most, expanding our family ecosystem.
Our vision is to become the **leading alternative in technological solutions that connect families.**
