

Cohere: Your next breakthrough powered by AI

Cohere helps enterprise turn AI into business value. Our models and platforms are built for scale, accuracy, and adaptability, enabling organizations to quickly integrate AI into critical workflows and see measurable results.

Trusted by industry leaders

Trusted at enterprise scale

Cohere delivers consistent, accurate performance across industries. Our models are proven in production, giving enterprises the reliability and control needed for mission-critical applications.

Tailored to your business

Cohere's models can be fine-tuned to proprietary data to achieve domain-specific accuracy. This flexibility ensures AI adapts to your workflows, industry requirements, and unique goals.

Impact you can measure

Our platforms are optimized for rapid integration and fast time to value. Cohere helps teams boost productivity and drive ROI, turning AI adoption into lasting business results.

Why Cohere?

Partnership for faster scale

Cohere works side-by-side with enterprises to accelerate timelines from pilot to production. Our teams ensure AI is deployed quickly, efficiently, and with measurable impact.

Security you can trust

Built with enterprise-grade safeguards, Cohere ensures data privacy, accuracy, and reliability. Our commitment to security helps organizations adopt AI with confidence.

Strength in vertical integration

From foundational models to enterprise applications, Cohere provides vertically integrated capabilities. This approach delivers consistency, performance, and flexibility across every layer of the AI stack.

North

AI workspace that empowers employees to create, search, and collaborate with AI agents, seamlessly connected to company knowledge and workflows.

Command models

Enterprise-grade generative models designed for efficiency, accuracy, and controllability. Built to handle the most demanding use cases.

Search & retrieval

Advanced retrieval capabilities that ground responses in your company's data, ensuring reliable, accurate answers every time.
