eSIM Module

The eSIM module is the new feature from Netmon that allows you to independently purchase and manage prepaid data traffic plans for travelling employees.

The **eSIM Module** is integrated with Netmon

You can purchase data traffic profiles for various destinations, quickly assign the eSIMs to the employees, and control data usage.

- Direct purchase through the web platform
- Assign the eSIM via email or link
- Monitor data usage
- Track all your purchases
- You can assign the eSIM directly to registered users

eSIM Shop

Purchase one or more prepaid data traffic profiles based on the desired destination, in real time.

Search for the needed profile by country or country groups

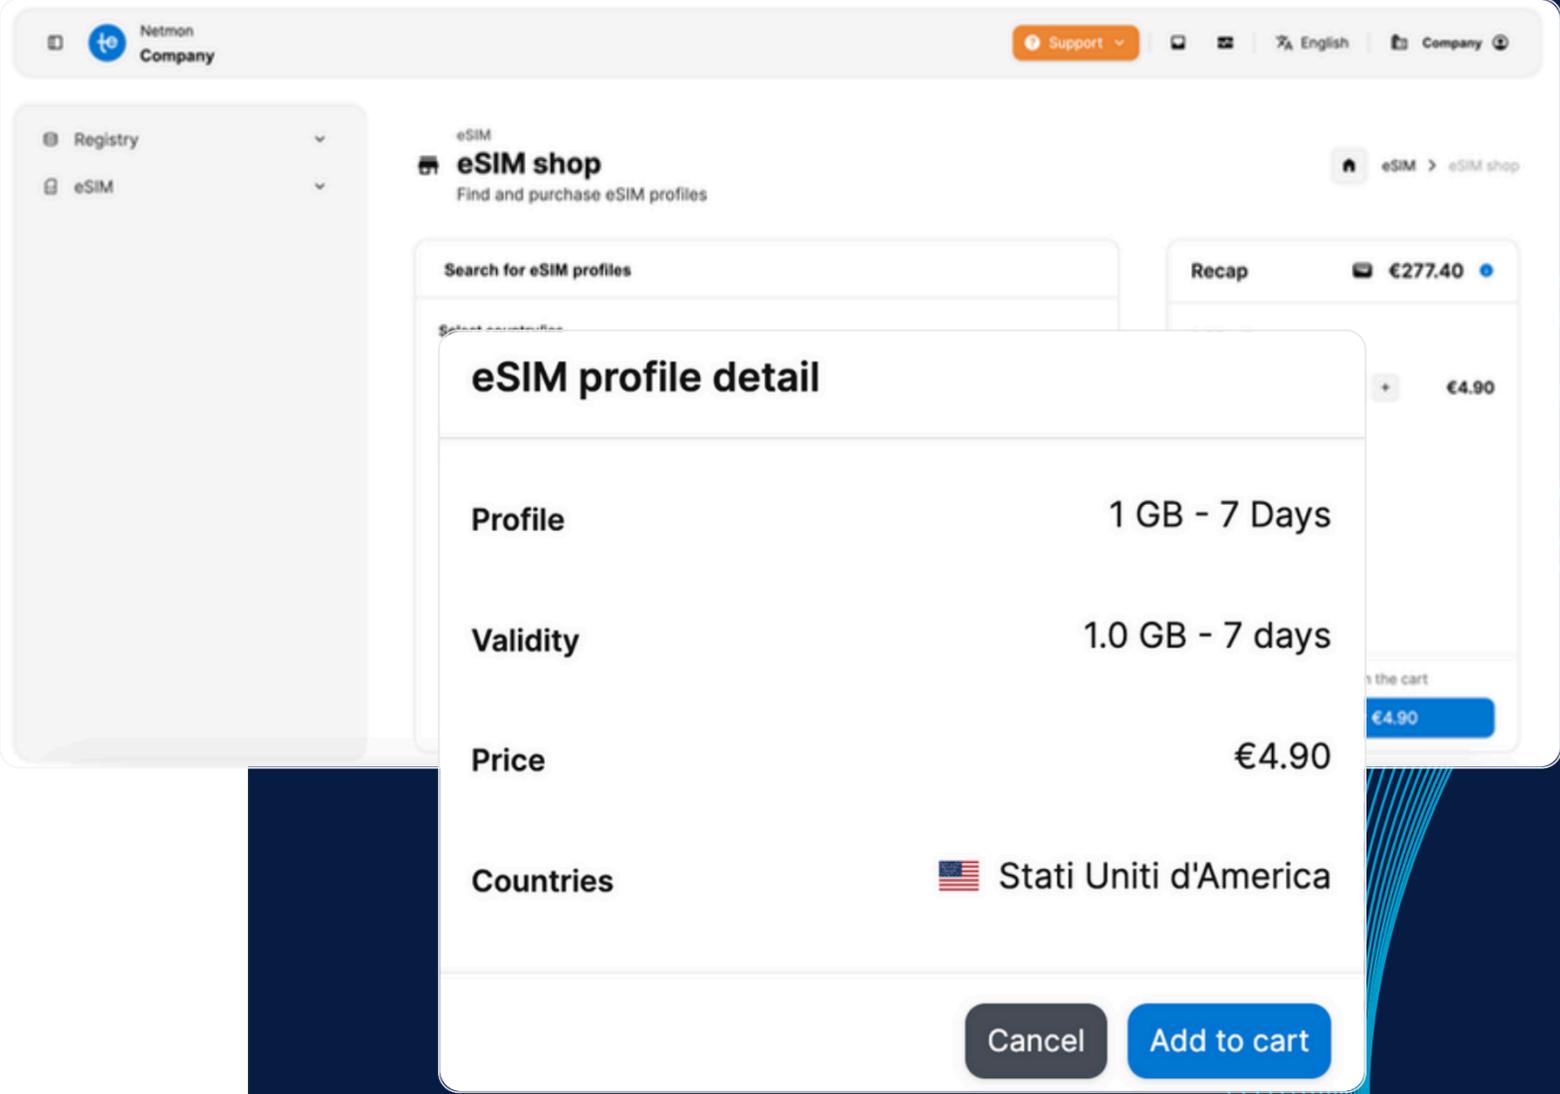

Select the appropriate profile based on available data traffic (GB) and validity period.

Add the selected eSIM to the cart

Confirm your purchase

The screenshot displays the Netmon Company eSIM shop interface. A modal window titled "eSIM profile detail" is open, showing the following information:

Profile	1 GB - 7 Days
Validity	1.0 GB - 7 days
Price	€4.90
Countries	 Stati Uniti d'America

At the bottom of the modal, there are two buttons: "Cancel" and "Add to cart". In the background, the main shop interface is visible, including a search bar, a "Recap" section showing a total of €277.40, and a list of items with a price of €4.90.

eSIM List

In the list of purchased eSIMs, you can view the inventory of all purchased profiles, the amount of data available for each eSIM, its status, and the user to whom it is assigned.

Details of the eSIMs

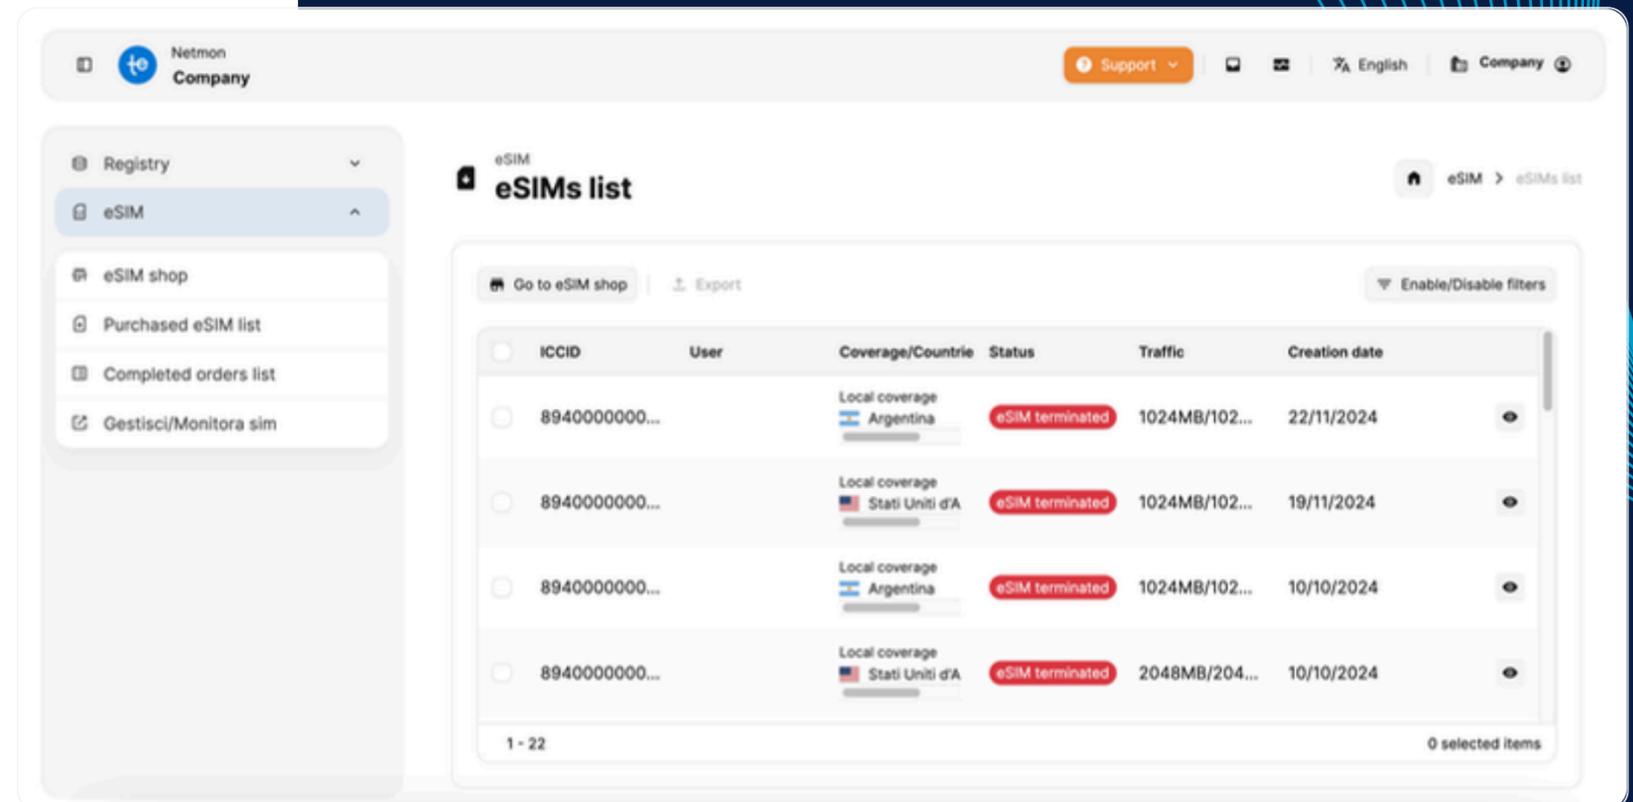

Setup instructions based on the device (QR Code, activation code)

Direct assignment of an eSIM to a registered user

Usage control and ability to recharge eSIM's credit

The screenshot shows the 'eSIMs list' page in the Netmon Company dashboard. The page features a sidebar with navigation options: Registry, eSIM (selected), eSIM shop, Purchased eSIM list, Completed orders list, and Gestisci/Monitora sim. The main content area displays a table of eSIM profiles with columns for ICCID, User, Coverage/Country, Status, Traffic, and Creation date. The table contains four rows, all with a status of 'eSIM terminated'. The first row shows a user with local coverage in Argentina, 1024MB/102... traffic, and a creation date of 22/11/2024. The second row shows a user with local coverage in Stati Uniti d'A, 1024MB/102... traffic, and a creation date of 19/11/2024. The third row shows a user with local coverage in Argentina, 1024MB/102... traffic, and a creation date of 10/10/2024. The fourth row shows a user with local coverage in Stati Uniti d'A, 2048MB/204... traffic, and a creation date of 10/10/2024. The page also includes a 'Go to eSIM shop' button, an 'Export' button, and an 'Enable/Disable filters' button. The bottom of the table shows '1 - 22' and '0 selected items'.

ICCID	User	Coverage/Country	Status	Traffic	Creation date
8940000000...		Local coverage Argentina	eSIM terminated	1024MB/102...	22/11/2024
8940000000...		Local coverage Stati Uniti d'A	eSIM terminated	1024MB/102...	19/11/2024
8940000000...		Local coverage Argentina	eSIM terminated	1024MB/102...	10/10/2024
8940000000...		Local coverage Stati Uniti d'A	eSIM terminated	2048MB/204...	10/10/2024

Order List

Track your individual or cumulative purchases and any recharges on this page. Manage your spending effectively.

Order history export

The screenshot shows the 'eSIM Order detail' page for the identifier 'mwc-profile-2024_327_20245523'. The page includes a sidebar with navigation options like 'Registry', 'eSIM', 'eSIM shop', 'Purchased eSIM list', 'Completed orders list', and 'Gestisci/Monitora sim'. The main content area displays order details such as the date (22/11/2024), status (Completed), and total amount (€6.50). A 'Purchased profiles' section shows one profile with 1 GB - 7 Days validity and Local coverage in Argentina. The page also features a top navigation bar with 'Support', 'English', and 'Company' options, and a breadcrumb trail: 'eSIM > Lista ordini > Order detail'.

Field	Value
Identifier	mwc-profile-2024_327_20245523
Date	22/11/2024
Status	Completed
Total	€6.50
Note	

Profile	Validity
1 GB - 7 Days	1.0 GB - 7 days

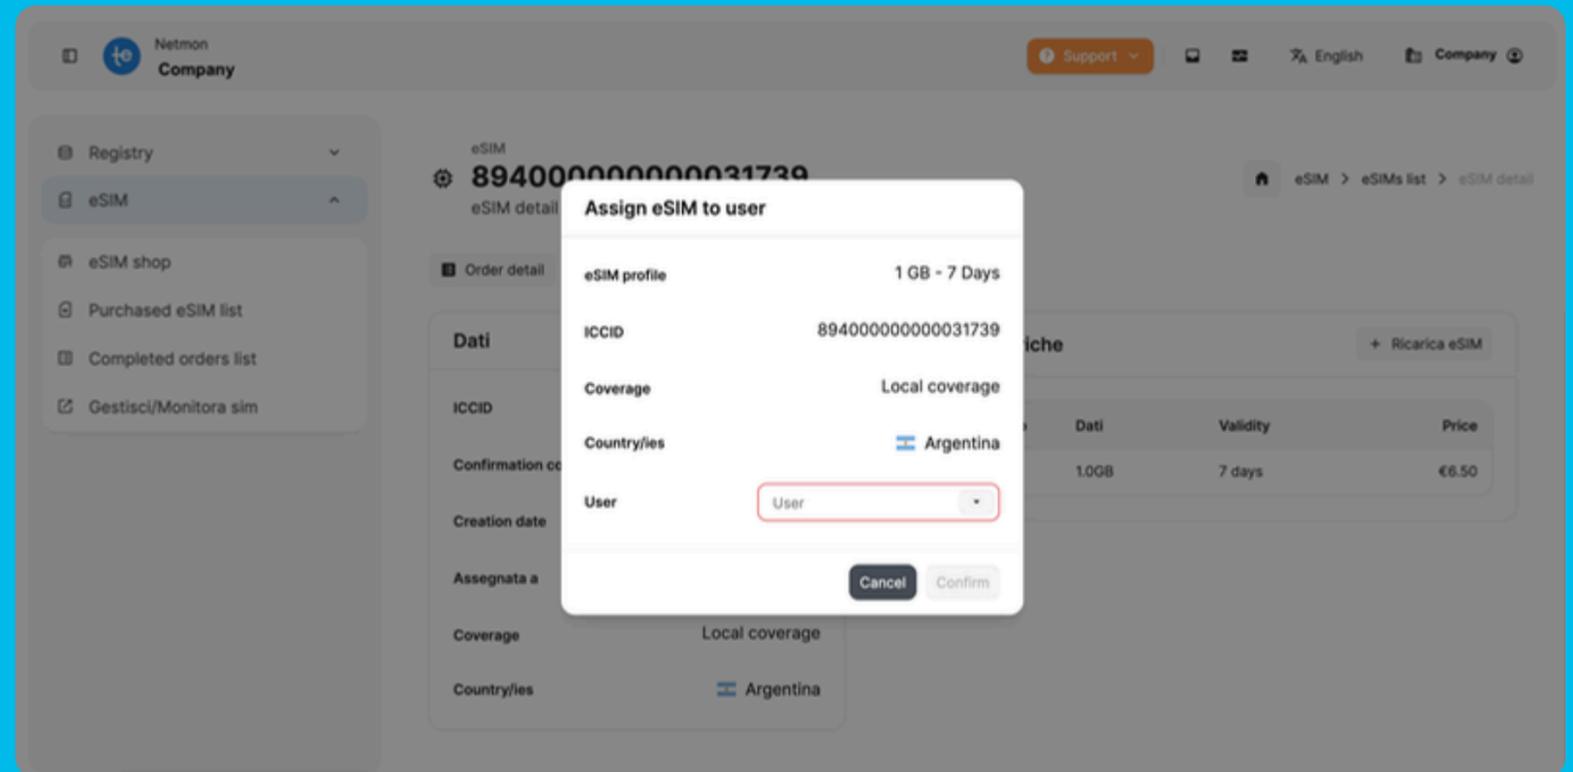

Coverage	Country/ies
Local coverage	Argentina

Guided Activation of Profiles for All Devices that Support eSIMs

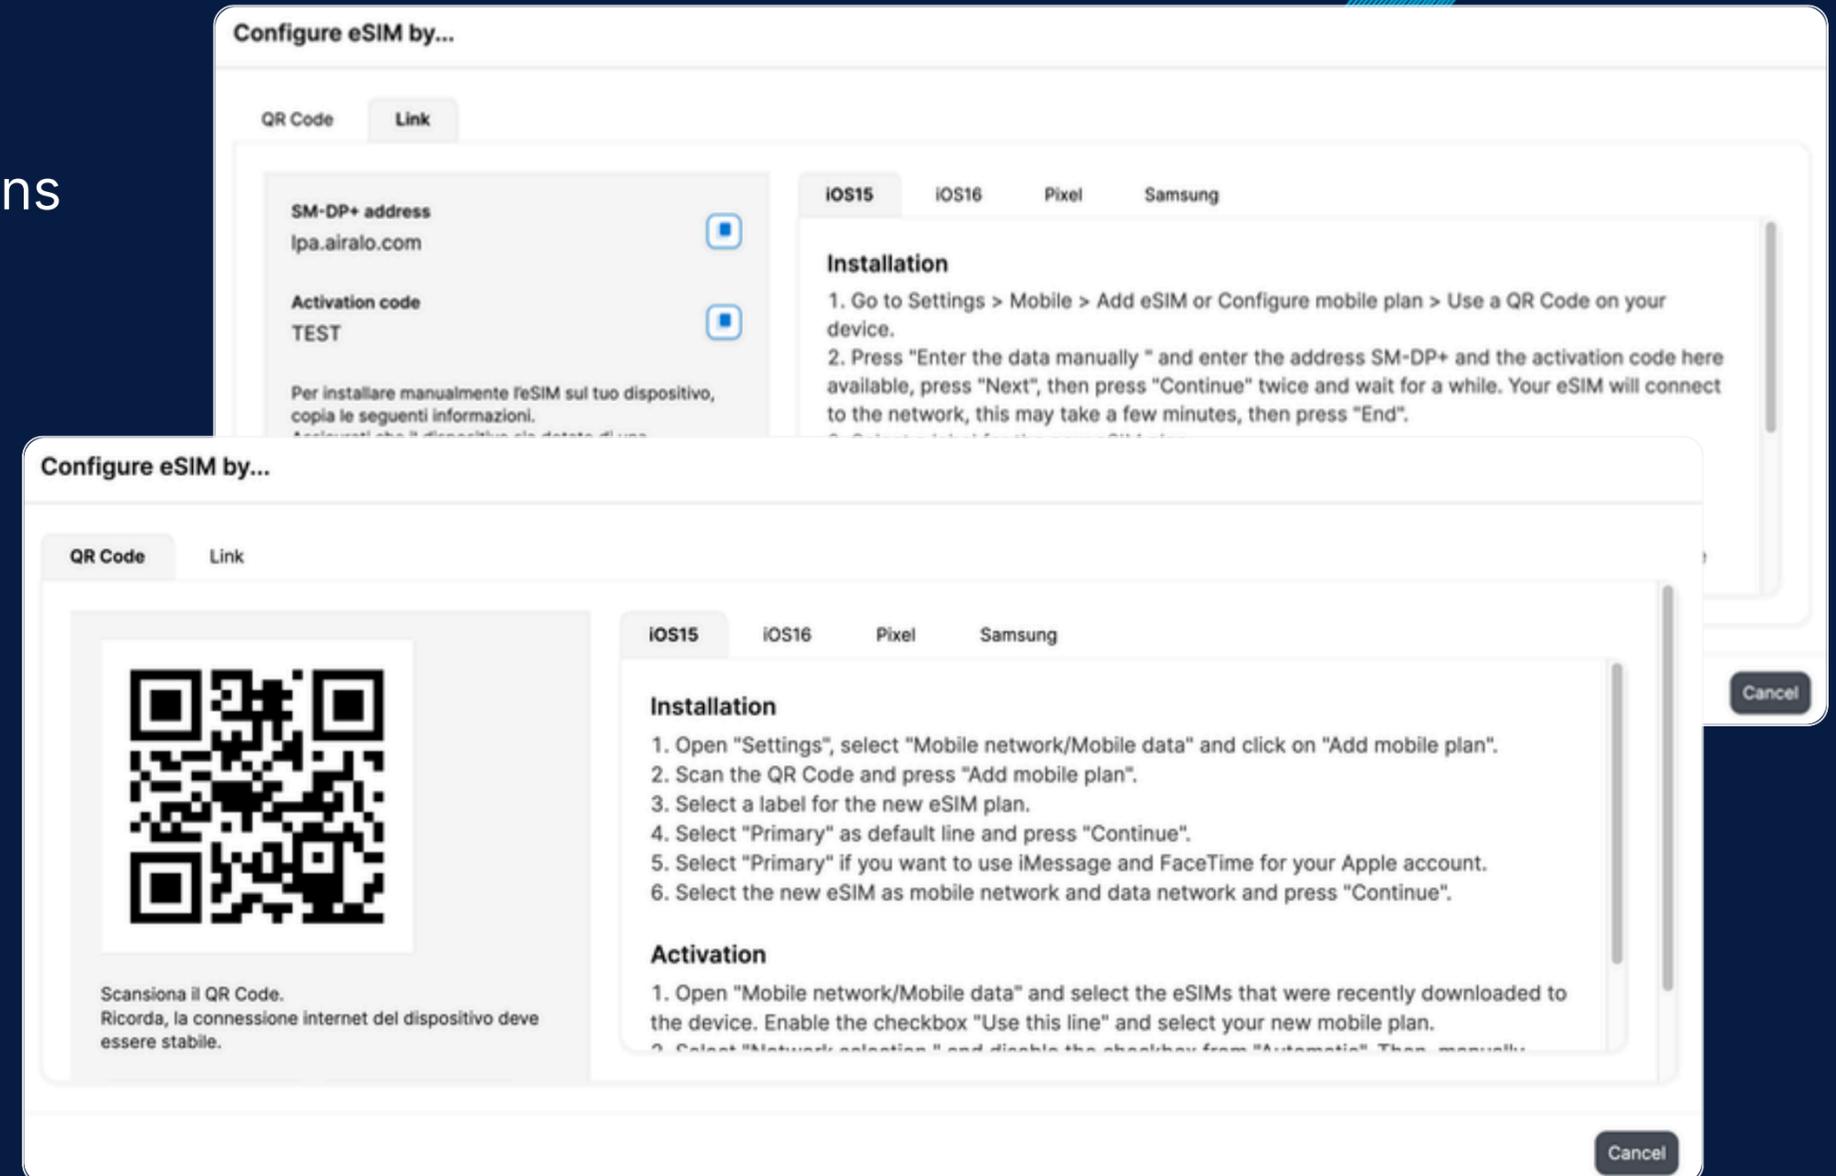

You can assign an eSIM to the employee by providing all necessary information for installation and activation based on their device.

Assigning the eSIM to the user

We provide you with several options to make it easier to send the eSIM and the necessary installation instructions to the end user.

- **Email direct sending by platform to a user already registered**
- **QR Code or link sending via email, external to the platform**
- **Sending a link to the user's device via chat services if they cannot scan the QR Code**

Advantages

Easy management

- Immediate purchase
- Direct assignment to employees
- Full corporate asset management through Netmon Registry integration

Control and visibility

- Monitoring the activation status of eSIMs
- Data traffic usage control
- Purchase tracking and spending management
- Opportunity to send notifications about usage status

Flexibility and scalability

- Diversified prepaid traffic profiles
- Suitable for all companies that need various temporary data packages
- Opportunity to recharge the traffic for certain profiles
