

Higher quality, streamlined, and scalable translation, enabled by Contextual AI

The Leading AI Solution for Enterprise Translation

Reach Your Global Audience

Our stack, made up of our Contextual AI Engine, Connector APIs, and Human Feedback, enables global organizations to adopt a true AI translation strategy, focusing on business outcomes instead of outputs.

LILT's Approach

Contextual AI Engine

LILT's large language models instantly retrain in real time, enabling higher accuracy, greater consistency, and alignment to the customer's brand voice.

Connector Integrations

Content creators are empowered to publish across languages from their workflows (e.g. CMS, design, code repositories, etc.).

Human Feedback

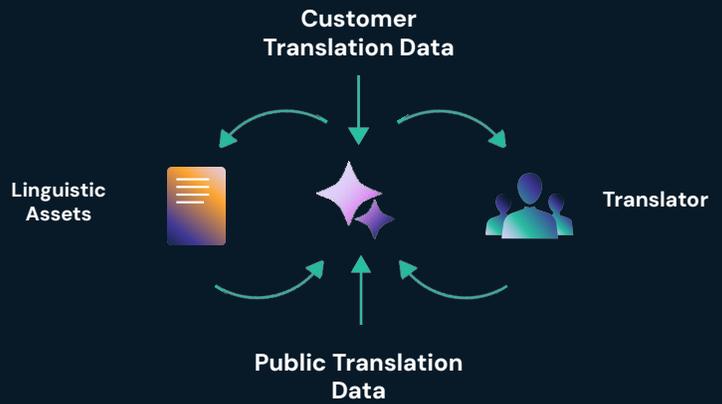

Skilled linguists review AI-generated translation suggestions, powering In-Context Learning with real-time feedback.

Trusted by companies like

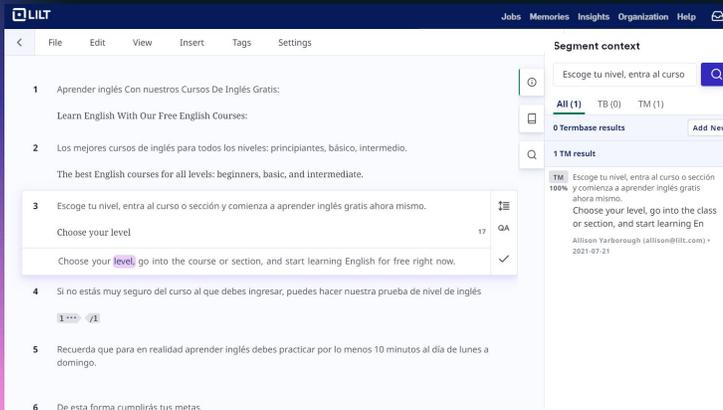

Contextual AI Engine

Our Contextual AI Engine learns from your company's content and is trained in real time by feedback from professional human translators. This means that as more content gets translated, translation performance rapidly improves – resulting in higher quality, faster turnaround times, and lower costs.

LILT Translate

Translators work in LILT Translate, our industry-leading CAT tool, powering the instant retraining of our Contextual AI Engine through their activity. This results in increased translation velocity and faster content turnaround times, thanks to:

- ✓ Predictive suggestions that improve in real time based on feedback
- ✓ Auto-population of previously translated phrases
- ✓ Company-specific terminology
- ✓ Features for translators to research challenging phrases

What our customers say:

"The productivity gains from LILT's AI-powered translation services have enabled us to reduce translation costs by 40% year-over-year for the same volume of content."

Head of Localization
Intel

"ASICS increases translation velocity by 60% and reduces costs by 70% with LILT."

Director of Localization
ASICS

"LILT's focus on technology, AI, and connectors, along with the team's leadership and experience, was very impressive."
