OffNetSecure

OffNetSecure by Allot, Protecting Your Customers, Even Off Your Network.
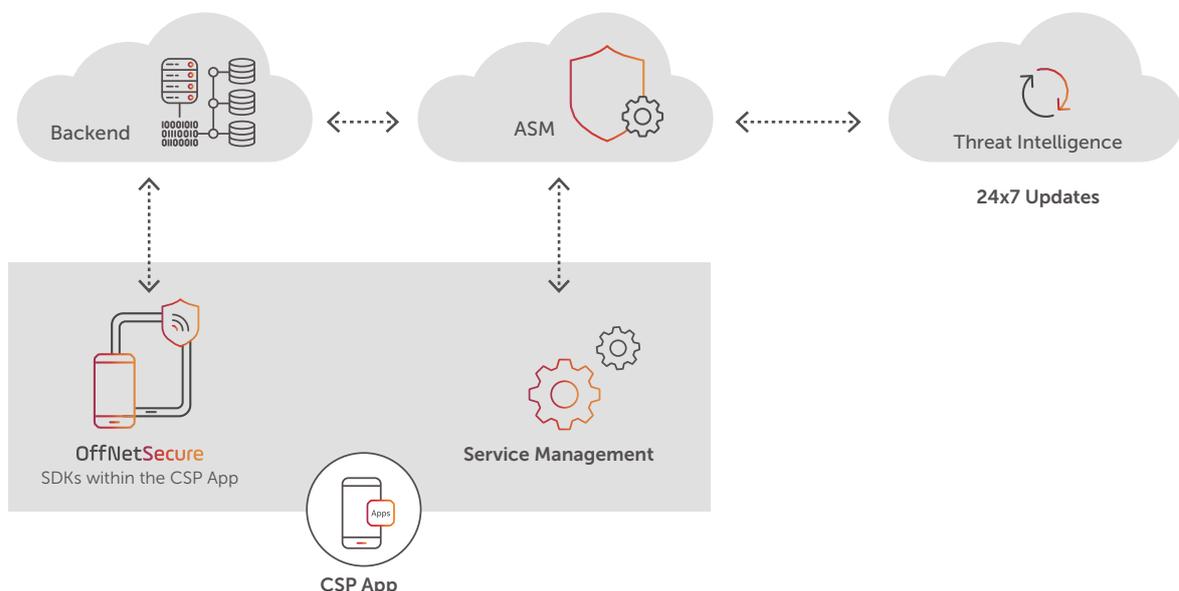

In today's hyper-connected world, people often live their digital lives even outside their home or work network—using public Wi-Fi networks, for example. OffNetSecure by Allot is a cutting-edge solution, and a part of the Allot Secure solutions suite. It's designed to safeguard your customers from cyber threats, no matter where they connect. Creating additional Security-as-a-Service revenue stream, growing customer loyalty, and enhancing your telco brand reputation.

Comprehensive Protection, Even When They Are Off Your Network

o **Continuous Security**: Defend users against malware scams such as: phishing attempts, ransomware, and more.

o **Parental Controls**: Peace of mind for families with a way for parents to control content and screentime for their kids.

o **Specific policy enforcement**: Customers can block specific content, categories, and websites even when off your network.

Simple Deployment, Unified Management

o **Simple Deployment**: Integrated into the MyTelco application – Increasing value and stickiness (SDK driven).

o **Single Unified Console**: Unified provisioning, management, and configuration. Manage policies, track security events, and generate reports from one centralized platform.

o **Comprehensive protection across the digital ecosystem**: Filtering safeguards users across mobile Android and iOS devices, preventing access to malicious and unwanted content.

Backend · ASM · Threat Intelligence · 24x7 Updates · OffNetSecure SDKs within the CSP App · Service Management · CSP App

Why OffNetSecure?

Allot's decades of experience in network intelligence and security power OffNetSecure to provide reliable threat defense that safeguards your residential and SME customers. With OffNetSecure, you can grow Security-as-a-Service revenue, elevate retention, and enhance your brand reputation.

About Allot Secure

Allot Secure enables mobile and fixed operators to secure their customers with 360-degree end-to-end protection, anywhere, any time, and on any device. All products within the Allot Secure portfolio enjoy unified provisioning and a management system that delivers network-native security. Customers are always protected on all connected devices, wherever they may be. This drives industry-leading adoption and revenue opportunities for CSPs.
